These forward-looking statements, whether made by us or a third party, are based on our current plans, estimates and expectations and actual results may differ materially from those suggested by such forward-looking statements.

Actual results may differ materially from those suggested by forward-looking statements due to risks or uncertainties associated with expectations relating to and including, regulatory changes pertaining to the industries in India in which we operate and our ability to respond to them, our ability to successfully implement our strategy, our growth and expansion, technological changes, our exposure to market risks, general economic and political conditions in India which have an impact on its business activities or investments, the monetary and fiscal policies of India, inflation, deflation, unanticipated turbulence in interest rates, foreign exchange rates, equity prices or other rates or prices, the performance of the financial markets in India and globally, changes in domestic laws, regulations and taxes and changes in competition in the industries in which we operate.

- There have been instances of delays of certain forms which were required to be filed as per the reporting requirements under the Companies Act, 2013 to RoC. Further, there have also been instances where our Company has inadvertently filed incorrect information with the RoC in its statutory filings.
- We do not have long term agreements with suppliers for our raw materials and an increase in the cost of or a shortfall in the availability of such raw materials could have an adverse effect on our business, results of operations and financial condition.
- We depend on a few customers of our products, for a significant portion of our revenue, and any decrease in revenues or sales from any one of our key customers may adversely affect our business and results of operations.
- We conduct our business activities on a purchase order basis and therefore, have not entered into long-term agreements with our customers.

For further discussion of factors that could cause the actual results to differ from our estimates and expectations, see “**Risk Factors**”, “**Our Business**” and “**Management’s Discussion and Analysis of Financial Position and Results of Operations**” beginning on Page Nos. 25, 92 and 139, respectively, of this Prospectus. INTERNAL RISK FACTORS

BUSINESS RELATED RISKS

- 1. We are required to obtain licenses and approvals under several legislations. Our inability to obtain or renew such permits, approvals and licenses in the ordinary course of our business may adversely affect our business, financial condition and results of operations.***

We are required to obtain and renew various licenses and approvals under several legislations from time to time. As of the date of this Prospectus, our company has applied for various approvals amongst others, including, registration under Factories Act, 1948 for both our manufacturing units and applications for change of name of our Company post conversion from a private limited company to a public limited company. These approvals, licenses, registrations and permits are subject to several conditions and are primarily valid for a specific period. For example, our trade license and licenses under FSS Act, 2006 are typically granted for a designated period of time and we are required to renew such licenses after such period. However, in some cases, these licenses could have been granted for shorter period as well. These licenses contain certain terms and conditions which are required to be complied with throughout the period of the license. We cannot assure you that we shall be able to obtain or renew such licenses or be able to continuously meet such conditions specified in such licenses or be able to prove compliance with such conditions to statutory authorities, which may lead to cancellation, revocation or suspension of relevant consents/permits/licenses/approvals. We cannot assure you that we shall be able to obtain such licenses or approvals on a timely manner or at all which may affect the timelines or the operations of the outlet. Further, the relevant authorities may also initiate penal actions against us, restrain our operations, impose fines/penalties or initiate legal proceedings for inability to obtain approvals in a timely manner or at all. Any such failure or delay in obtaining such consents, approvals, permits and licenses may affect our ability to continue our operations, which may in turn have an adverse effect on our business, financial condition and results of operations.

- 2. There have been instances of delays of certain forms which were required to be filed as per the reporting requirements under the Companies Act, 2013 to RoC. Further, there have also been instances where our Company has inadvertently filed incorrect information with the RoC in its statutory filings.***

In the past, there have been certain instances of delays in filing statutory forms, such as Forms MGT-14 as per the reporting requirements under the Companies Act, 2013 with the RoC, which have been subsequently filed by payment of an additional fee as specified by RoC.

There have also been instances wherein the disclosures made in the statutory filings done under Companies Act, 2013 are incomplete or erroneous in nature, for instance, (i) our Company inadvertently failed to disclose certain meetings of the board of directors and extra-ordinary general meetings of the shareholders in the Form MGT-7 filed by our Company for the F.Y. 2019-20, 2020-21 and 2021-22, for which we have successfully submitted the revised filing of Form MGT 7 for all three financial years to the Ministry of Corporate Affairs (MCA) by payment of an additional fee as specified by RoC . All the deficiencies have been addressed and corrected accordingly; (ii) Zainab Yusuf Safdari, the erstwhile director of our Company, was appointed as Additional Director in the Board Meeting held on September 20, 2021 to hold office upto the date of next ensuing annual general meeting of our Company. However, e-form DIR-12 filed for such appointment reflects his appointment as “Director” instead of Additional Director. The person is no more a director of the company and we have filed resignation with correct designation already; and (iii) our Whole-time Director and Promoter, Rathi Narayan Das was appointed as the Director in the AGM held on September 30, 2022, which has also been minuted in the minutes of such AGM maintained by our Company and requisite e-form for change of his designation from Additional Director to Director have been filed with Ministry of Corporate Affairs (MCA). However, unintentionally and inadvertently the agenda point for appointing Rathi Narayan Das as Director has been missed from the notice of the annual general meeting which is attached to e-Form AOC-4 filed with ROC for the F.Y. 2021-22. However, the Company initiated the process to rectify the non-compliance and an addendum was served as an official communication supplementing the original notice, specifically including the appointment of Mr. Rathi Narayan Das as a Director.

No show cause notice in respect to the mentioned non-compliance in the risk factor no 2 in draft red hearing prospectus has been received by our Company till date and no penalty or fine has been imposed by any regulatory authority in respect to the same. It cannot be assured, that there will not be such instances in the future or our Company will not commit any further delays or defaults in relation to its reporting requirements, or any penalty or fine will not be imposed by any regulatory authority in respect to the same. The happening of such event may cause a material effect on our results of operations and financial position.

- 3. Any non-compliance or delays in GST Return Filings and EPF Payments may expose us to penalties from the regulators.***

As a Company, we are required to file GST returns and make payments in respect of Employee Provident Fund with the respective authorities. However, there are certain inadvertent delays in relation to filling of GST returns and EPF payments in the past for which the Company have paid the penalties and taken the steps to improve the internal system for payment of GST to mitigate the technical difficulties and the Company has appointed an external consultant to ensure timely payment of towards EPF. However, we cannot assure that we will not be subject to any legal proceeding or regulatory actions, including monetary penalties by statutory authorities on account of any inadvertent discrepancies in our GST filling or EPF payment in future, which may adversely affect our business, financial condition, and reputation.

4. ***We do not have long term agreements with suppliers for our raw materials and an increase in the cost of or a shortfall in the availability of such raw materials could have an adverse effect on our business, results of operations and financial condition.***

Production quantity and cost of our products are dependent on our ability to source raw materials and packaging materials at acceptable prices, and maintain a stable and sufficient supply of our major raw materials. Our key raw materials include pulses, spices like chillies, coriander powder and other additives. We source our raw materials from across the country to ensure that the products we manufacture have an authentic taste without artificially disturbing the natural taste of the spices or other food products. For instance, for our chilli powder we source our chillies from the farms of Guntur, Khammam, Warangal, Raichur, Byadgi, Malakpet, Hyderabad and our 'Srivari Whole Wheat Atta' and 'Sharbati Atta' is made from wheat grains which are sourced from Sehore, Vidisha and Sironj in Madhya Pradesh. Therefore, each of our products is made from the finest natural produce which caters to the genuine taste and an assurance of authenticity. There can be no assurance that we will be able to procure all of our future raw material requirements at commercially viable prices. Furthermore, in the event that such suppliers discontinue their supply to us or if we are unable to source quality raw material from other suppliers at competitive prices, we may not be able to meet our production and sales targets. Interruption of, or a shortage in the supply of, raw material may result in our inability to operate our production facilities at optimal capacities or at all, leading to a decline in production and sales. An inability to procure sufficient quality raw material at reasonable cost, or an inability to pass on any additional cost incurred on purchase of raw materials to our customers, may adversely affect our operations and financial conditions.

5. ***We depend on a few customers of our products, for a significant portion of our revenue, and any decrease in revenues or sales from any one of our key customers may adversely affect our business and results of operations.***

The percentage of Total Revenue from our top 10 customers were 56.70%, 78.78% and 70.24% in FY21, FY22 and FY23 respectively. For FY20 the business was solely in the B2C model.

Our Company is engaged in the business of manufacturing spices and flour (chakki atta) and marketing and selling it in and around Telangana and Andhra Pradesh. Our business operations are highly dependent on our customers and the loss of any of our customers may adversely affect our sales and consequently on our business and results of operations. While we typically have long term relationships with our customers, we have not entered into long terms agreements with our customers and the success of our business is accordingly significantly dependent on us maintaining good relationships with our customers and suppliers. The actual sales by our Company may differ from the estimates of our management due to the absence of long term agreements. The loss of one or more of these significant or key customers or a reduction in the amount of business we obtain from them could have an adverse effect on our business, results of operations, financial condition and cash flows. We cannot assure you that we will be able to maintain historic levels of business and/or negotiate and execute long term contracts on terms that are commercially viable with our significant customers or that we will be able to significantly reduce customer concentration in the future. If there occurs any change in the market conditions, requirements of our customers, or if we fail to identify and understand evolving industry trends, preferences or fail to meet our customers' demands, it might have a direct impact on our revenue and customer base. The inability to procure new orders or expand our customer base on a regular basis or at all may adversely affect our business, revenues, cash flows and operations.

6. ***We conduct our business activities on a purchase order basis and therefore, have not entered into long-term agreements with our customers.***

Our Company is engaged in the business of manufacturing spices and flour (chakki atta) significantly on the basis of orders which are received from our customers. We have not entered into any formal agreements, arrangement or any other understanding with our customers and therefore, our business is dependent upon the continuous relationship with the customers and the quality of products supplied to us. Further, neither do we have any exclusive agents, dealers, distributors nor have we entered into any agreements with any of the market intermediaries for selling or marketing the products supplied to us. If there occurs any change in the market conditions, market trends, requirements of our customers, or if we fail to identify and understand evolving industry trends, preferences or fail to

meet our customers' demands, it might have a direct impact on our revenue and customer base. The inability to procure new orders on a regular basis or at all may adversely affect our business, revenues, cash flows and operations.

- 7. *The improper handling, processing or storage of our raw materials or products, or spoilage of and damage to such raw materials and products, or any real or perceived contamination in our products, could subject us to regulatory action, damage our reputation and have an adverse effect on our business, results of operations and financial condition.***

All the products that we manufacture are for human consumption and are subject to risks such as contamination, adulteration, and product tampering during their manufacture, transport or storage. Our raw materials and our products are required to be stored, handled, and transported at specific temperatures and under certain food safety conditions. Any shortcoming in the production or storage of our products due to negligence, human error or otherwise, may damage our products and result in non-compliance with applicable regulatory standards. Any allegation that our products contain contaminants could damage our reputation, adversely affect our sales and result in legal proceedings being initiated against us, irrespective of whether such allegations have any factual basis.

The improper handling, processing or storage of our raw materials or products, or spoilage of and damage to such raw materials and products, or any real or perceived contamination in our products, could subject us to regulatory action, damage our reputation and have an adverse effect on our business, results of operations and financial condition.

- 8. *Our business is dependent on our processing units for few products. The loss of or shutdown of operations of our processing units may have a material adverse effect on our business, financial condition and results of operations.***

Our spices processing unit is subject to operating risks, such as the breakdown or failure of equipment, power supply or processes, performance below expected levels of output or efficiency, obsolescence, labour disputes, lock-outs, earthquakes and other natural disasters, industrial accidents and the need to comply with the directives of relevant government authorities. The occurrence of any of these risks could significantly affect our operating results. We carry out planned shutdowns for maintenance. Although we take precautions to minimize the risk of any significant operational problems at our facilities, our business, financial condition and results of operations may be adversely affected by any disruption of operations at our facilities, including due to any of the factors mentioned above.

- 9. *Our operations are considerably located in Telangana and Andhra Pradesh and failure to expand our operations may restrict our growth and adversely affect our business.***

Currently, we are carrying our business mainly in Telangana and Andhra Pradesh and hence our major revenues are generated from operations in these regions only. Geographical and functional expansion of our business domain requires establishment of adequate network. As we seek to diversify our regional focus, we may face the risk that our competitors may be better known in other markets, enjoy better relationships with customers. Our lack of exposure in geographical boundaries outside our operating regions could impact our future revenues, our operating results and financial conditions.

- 10. *Our Company has ventured into manufacturing and trading of spices in 2019 and of whole wheat flour in 2021, and therefore has a very limited operating history of our operations with respect to the same, which will make it difficult for the investors to evaluate our historical performance or future prospects.***

Our Company started its business operations in 2019 by setting up a production facility at Survey number 234/4, and 234/5, Jalpally Village, Balapur Mandal, Jalpally Municipality, Ranga Reddy District, Telangana for manufacturing turmeric powder (*haldi*), chilli powder (*mirchi*) and coriander powder (*dhaniya*). In 2021, our Company expanded its business operations by manufacturing Srivari spices, continuing with its mission to provide genuine products, diversified into madras sambar masala, chicken masala, garam masala and mutton masala in pouches, boxes and bottles. In 2021, our Company was awarded with the title of 'Best Emerging Spices Brand- 2021' by Business Mint. Further, in the year 2021, our Company expanded its business operations by setting up a new manufacturing unit at Raikal Village, Farooqnagar Mandal, Ranga Reddy District, Telangana. Lastly, in 2022 we introduced a new product category by manufacturing whole wheat flour (*chakki atta*). Since, we have a limited operating history of manufacturing spices and whole wheat flour (*chakki atta*), we may not have sufficient experience to address the risks related to the manufacturing of the said products. Due to our limited experience, we may not be able to identify the risks involved in such operations and therefore could fail to achieve timely fulfillment of our orders and the quality requirement of our products. Since we are not abreast with the market, we may not be successful in identifying our competitors or keeping up with the requirements of the customer base. We may face difficulty in understanding the demand and supply patterns, marketing segments for such products which may pose a risk in the smooth operation, and working of our proposed manufacturing unit. In the event that we fail to understand the market operations and the risks related to the same, our business, financial performance and cash flows may be affected.

11. *Our continued operations are critical to our business and any shutdown of our manufacturing units may adversely affect our business, results of operations and financial condition.*

Our manufacturing units are located in Hyderabad. As a result, any local social unrest, natural disaster or breakdown of services and utilities in these areas could have material adverse effect on the business, financial position and results of our operations. Our current manufacturing units are subject to operating risks, such as breakdown or failure of equipment, power supply or processes, reduction or stoppage of water supply, performance below expected levels of efficiency, obsolescence, natural disasters, industrial accidents and the need to comply with the directives of relevant government authorities.

In the event, we are forced to shut down our manufacturing units for a prolonged period; it would adversely affect our earnings, our other results of operations and financial condition as a whole. Spiralling cost of living around our units may push our manpower costs in the upward direction, which may reduce our margin and cost competitiveness. For instance, due to the ongoing pandemic and the lockdown imposed by the Central Government and various state governments, we may be required to shut down our manufacturing units which may cause an adverse impact on our business operations, revenue, results of operations and financial conditions.

In addition to the above if our manufacturing units suffer losses as a result of any industrial accident, we may be forced to shut down our manufacturing units which could result in us being unable to meet with our commitments, which will have an adverse effect on our business, results of operation and financial condition. Further, any contravention of or non-compliance with the terms of various regulatory approvals applicable to our manufacturing units may also require us to cease or limit production until such non-compliance is remedied to the satisfaction of relevant regulatory authorities. We cannot assure you that we will not experience work disruptions in the future resulting from any dispute with our employees or other problems associated with our employees and the labor involved in our manufacturing units, which may hinder our regular operating activities and lead to disruptions in our operations, which could adversely affect our business, prospects, financial condition, cash flows and results of operations.

12. *Any failure in our quality control processes may adversely affect our business, results of operations and financial condition. We may face product liability claims and legal proceedings if the quality of our products does not meet our customers' expectations.*

Our products may contain certain quality issues or undetected errors, due to defects in manufacture of products or raw materials which are used in the products. We have implemented quality control processes for our raw materials and finished goods on the basis of internal quality standards. However, we cannot assure you that our quality control processes or our product will pass the quality tests and inspections conducted by various agencies as per their prescribed standards will not fail. Any shortcoming in the raw materials procured by us or in the production of our products due to failure of our quality control procedures, negligence and human error or otherwise, may damage our products and result in deficient products. It is imperative for us to meet the regulatory quality standards set by regulatory agencies and our customers as deviation from the same can cause them to reject our products and can also cause damage to our reputation, market standing and brand value.

In the event the quality of our products is sub-standard or our products suffer from defects and are returned by our customers due to quality complaints, we might be compelled to take back the sub-standard products and reimburse the cost paid by our customers. Such quality lapses could strain our longstanding relationship with our customers and our reputation and brand image may suffer, which in turn may adversely affect our business, results of operations and financial condition. Our customers may lose faith in the quality of our products and could in turn refuse to further deal in our products, which could have a severe impact on our revenue and business operations. We also face the risk of legal proceedings and product liability claims being brought against us by our customers for defective products sold. We cannot assure you that we will not experience any material product liability losses in the future or that we will not incur significant costs to defend any such claims. A product liability claim may adversely affect our reputation and brand image, as well as entail significant costs.

13. *Any adverse change in regulations governing our products and the products of our customers, may adversely impact our business prospects and results of operations.*

Regulatory requirements with respect to our products and the products of our customers are subject to change. An adverse change in the regulations governing the development of our products and their usage by our customers, including the development of licensing requirements and technical standards and specifications or the imposition of onerous requirements, may have an adverse impact on our operations. Our Company may be required to alter our manufacturing and/or distribution process and target markets and incur capital expenditure to achieve compliance with such new regulatory requirements applicable to us and our customers.

We cannot assure you that we will be able to comply with the regulatory requirements. If we fail to comply with new statutory or regulatory requirements, there could be a delay in the submission or grant of approval for manufacturing and marketing new products or we may be required to withdraw existing products from the market. Moreover, if we fail to comply with the various conditions attached to such approvals, licenses, registrations and permissions once received, the relevant regulatory body may suspend, curtail or revoke our ability to market such products and/or we may be deemed to be in breach of our arrangements with our customers. Consequently, there is an inherent risk that we may inadvertently fail to comply with such regulations, which could lead to forced shutdowns and other sanctions imposed by the relevant authorities, as well as the withholding or delay in receipt of regulatory approvals for our new products, which may adversely impact our business, results of operations and financial condition.

14. *Our inability to expand or effectively manage our sales and marketing network may have an adverse effect on our business, results of operations and financial condition.*

The efficiency of the marketing and sales network is critical to the success of our Company. Our success lies in the strength of our relationship with our customers who have been associated with our Company. Our Company has a unique business model, wherein we market and sell our products directly to our customers, without involving any major intermediaries, which helps us provide complete revenue share to the farmers and provide cost competitive and affordable products to our customers. We manufactured unadulterated products and do not add any preservatives in our products. We sustain our products by manufacturing and packaging products in quantities which are proportionate to the shelf life of our product, in order to avoid wastage and deliver a wide range of products which carry the freshness and goodness of each ingredient. Our business has two model first is direct to customer (“D2C”) in nature, wherein we deliver our products directly at the doorstep of our customers using approximately 15,000 retail stores. Secondly we also work in business to business (“B2B”), wherein we deliver our products to the suppliers directly for sell to their consumers. Therefore, once the product is consumed by our customers they place an order for the product and this helps us maintain a cyclic and continuous relationship with our customers. We do not have a distribution or a third-party marketing network, therefore we are highly dependent upon our internal sales and marketing teams.

We continuously seek to increase the penetration of our products with the continuous efforts of our sales and marketing teams by targeting different customer groups. We cannot assure you that we will be able to successfully deploy the efforts of our sales and marketing teams or effectively manage our existing network. If the terms offered to our sales and marketing executives by our competitors are more favourable than those offered by us, our sales and marketing executives may decline to distribute our products and terminate their arrangements with us. We may be unable to appoint replacement of our sales and marketing executives in a timely fashion, or at all, which may reduce our sales volumes and adversely affect our business, results of operations and financial condition.

15. *Any delays and/or defaults in customer payments could result in increase of working capital investment and/or reduction of our Company’s profits, thereby affecting our operation and financial condition.*

We are exposed to payment delays and/or defaults by our customers. Our financial position and financial performance are dependent on the creditworthiness of our customers. As per our business network model, we supply our products directly to our customers without taking any advance payment or security deposit against the orders placed by them. Such delays in payments may require our Company to make a working capital investment. We cannot assure you that payments from all or any of our customers will be received in a timely manner or to that extent will be received at all. If a customer defaults in making its payments on an order on which our Company has devoted significant resources, or if an order in which our Company has invested significant resources is delayed, cancelled or does not proceed to completion, it could have a material adverse effect on our Company’s results of operations and financial condition.

There is no guarantee on the timeliness of all or any part of our customers’ payments and whether they will be able to fulfil their obligations, which may arise from their financial difficulties, deterioration in their business performance, or a downturn in the global economy. If such events or circumstances occur, our financial performance and our operating cash flows may be adversely affected.

16. *Our Company requires significant amount of working capital for a continuing growth. Our inability to meet our working capital requirements may adversely affect our results of operations.*

Our business requires a significant amount of working capital. As per our settled business terms, we require our customers to pay the full amount of the consideration only after they receive the order, as a result, significant amounts of our working capital are often required to finance the purchase of raw material and execution of manufacturing processes before payment is received from our customers. Further, we are also required to meet the increasing demand and for achieving the same, adequate stocks have to be maintained which requires sufficient working capital. In the event, we are unable to source the required amount of working capital for addressing such increased demand of our

products, we might not be able to efficiently satisfy the demand of our customers. Even if we are able to source the required amount of funds, we cannot assure you that such funds would be sufficient to meet our cost estimates and that any increase in the expenses will not affect the price of our products.

Any delay in processing our payments by our customers may increase our working capital requirement. Further, if a customer defaults in making payments for a product on which we have devoted significant resources, it could affect our profitability and liquidity and decrease the capital reserves that are otherwise available for other uses. We may file a claim for compensation of the loss that we incurred pursuant to such defaults but settlement of disputes generally takes time and financial and other resources, and the outcome is often uncertain. In general, we take provisions for bad debts, including those arising from such defaults based primarily on ageing and other factors such as special circumstances relating to special customers. There can be no assurance that such payments will be remitted by our clients to us on a timely basis or that we will be able to effectively manage the level of bad debt arising from defaults. We may also have large cash outflows, including among others, losses resulting from environmental liabilities, litigation costs, adverse political conditions, foreign exchange risks and liability claims.

All of these factors may result, in increase in the amount of receivables and short-term borrowings. If we decide to raise additional funds through the incurrence of debt, our interest and debt repayment obligations will increase, and could have a significant effect on our profitability and cash flows and we may be subject to additional covenants, which could limit our ability to access cash flows from operations. Any issuance of equity, on the other hand, could result in a dilution of your shareholding. Accordingly, continued increases in our working capital requirements may have an adverse effect on our financial condition and results of operations.

- 17. *We are dependent on information technology systems in carrying out our business activities and it forms an integral part of our business. Further, if we are unable to adapt to technological changes and successfully implement new technologies or if we face failure of our information technology systems, we may not be able to compete effectively which may result in higher costs and would adversely affect our business and results of operations.***

We are dependent on information technology system in connection with carrying out our business activities and such systems form an integral part of our business. Any failure of our information technology systems could result in business interruptions, including the loss of our customers, loss of reputation and weakening of our competitive position, and could have a material adverse effect on our business, financial condition and results of operations. Additionally, our information technology systems, specifically our software may be vulnerable to computer viruses, piracy, hacking or similar disruptive problems. Computer viruses or problems caused by third parties could lead to disruptions in our business activities. Fixing such problems caused by computer viruses or security breaches may require interruptions, delays or temporary suspension of our business activities, which could adversely affect our operations. Breaches of our information technology systems may result in unauthorized access to confidential information. Such breaches of our information technology systems may require us to incur further expenditure to put in place advanced security systems to prevent any unauthorised access to our networks. In the event, any breach of our systems or software leads to the leaking of our trade secrets or any inventive techniques devised by our Company, it might lead to loss of our originality in the market and increase the chance of our products being substituted by the products of our competitors.

Our future success depends in part of our ability to respond to technological advancements and emerging standards and practices on a cost-effective and a timely basis. Our failure to successfully adopt such technologies in a cost-effective manner could increase our costs thereby compelling us to bid at lower margins which might lead to loss of bidding opportunities vis-à-vis such competitors. Additionally, the government authorities may require adherence with certain technologies and we cannot assure you that we would be able to implement such technologies in a timely manner or at all. The cost of upgrading or implementing new technologies or upgrading our existing equipment or expanding our capacity could be significant, less cost effective and therefore could negatively impact our profitability, results of operations, financial condition as well as our future prospects.

- 18. *We may be unable to grow our business in additional geographic regions or international markets, which may adversely affect our business prospects and results of operations.***

Our Company seeks to grow its market reach domestically to explore untapped markets and segments; however, we cannot assure you that we will be able to grow our business as planned. Infrastructure and logistical challenges in addition to the advancement of research and development in the food and spices industry, changing customers' taste and preferences may prevent us from expanding our presence or increasing the penetration of our products. Further, customers may be price conscious and we may be unable to compete effectively with the products of our competitors. If we are unable to grow our business in these new markets effectively, our business prospects, results of operations and financial condition may be adversely affected.

Further, expansion into new international markets is important to our long-term prospects. Competing successfully in international markets requires additional management attention and resources to tailor our services to the unique aspects of each new country. We may face various risks, including legal and regulatory restrictions, increased advertising and brand building expenditure, challenges caused by distance, language and cultural differences, in addition to our limited experience with such markets and currency exchange rate fluctuations. International markets require a very high standard of quality of products and our Company may not be able to match the international standards thereby failing to make a brand presence in the international markets. If we are unable to make long-lasting relations with the major customers in the overseas market or if we are unable to justify the quality of our products to them, it may make it difficult for us to enter into such markets. These and other risks, which we do not foresee at present, could adversely affect any international expansion or growth, which could have an adverse effect on our business, results of operations and financial condition.

- 19. We are dependent on third party transportation providers for delivery of raw materials to us from our suppliers and delivery of our products to our customers. We have not entered into any formal contracts with our transport providers and any failure on part of such service providers to meet their obligations could adversely affect our business, financial condition and results of operation.**

To ensure smooth functioning of our manufacturing operations, we need to maintain continuous supply and transportation of the raw materials required from the supplier to our manufacturing units and transportation of our products from our units to our customers, which may be subject to various uncertainties and risks. We are significantly dependent on third party transportation providers for the delivery of raw materials to us and delivery of our products to our customers. Uncertainties and risks such as transportation strikes or delay in supply of raw materials and products could have an adverse effect on our supplies and deliveries to and from our customers and suppliers. Additionally, raw materials and products may be lost or damaged in transit for various reasons including occurrence of accidents or natural disasters. A failure to maintain a continuous supply of raw materials or to deliver our products to our distribution intermediaries in a timely, efficient and reliable manner could adversely affect our business, results of operations and financial condition.

Further, we have not entered into any long term agreements with our transporters for our manufacturing units and the costs of transportation are generally based on mutual terms and the prevailing market price. In the absence of such agreements, we cannot assure that the transport agencies would fulfill their obligations or would not commit a breach of the understanding with us. In the event that the finished goods or raw materials suffer damage or are lost during transit, we may not be able to prosecute the agencies due to lack of formal agreements. Further, the transport agencies are not contractually bound to deal with us exclusively, we may face the risk of our competitors offering better terms or prices, which may cause them to cater to our competitors alongside us or on a priority basis, which could adversely affect our business, results of operations and financial condition.

- 20. Our Company has experienced negative cash flow in the past and may continue to do so in the future, which could have a material adverse effect on our business, prospects, financial condition, cash flows and results of operations.**

Our Company has experienced negative net cash flow in operating and investing activities in the past, the details of which are provided below:

(₹ in lacs)

Particulars	March 31, 2023	March 31, 2022	March 31, 2021
Net Cash Flow from/(used in) Operating Activities	914.50	(110.18)	(17.34)
Net cash generated from/(used in) investing activities	109.69	(178.20)	(195.13)
Net Cash Flow from/(used in) Financing Activities	1020.51	267.61	214.10

We may incur negative cash flows in the future which may have a material adverse effect on our business, prospects, results of operations and financial condition.

- 21. Our Company has availed certain unsecured loans which may be recalled at any time.**

Our Company has availed certain unsecured loans of which an amount of ₹ 285.33 lakhs is outstanding for the Financial Year ended March 31, 2023, which may be recalled at any time. In the event, any of such unsecured lenders seek a repayment of any these loans, our Company would need to find alternative sources of financing, which may not be available on commercially reasonable terms, or at all. If we are unable to arrange for any such financing arrangements, we may not have adequate working capital to undertake new projects or complete our ongoing projects.

Therefore, any such demand may adversely affect our business, financial condition and results of operations. For further details, see “**Financial Indebtedness**” on page 136 of this Prospectus.

22. *Our inability to manage inventory in an effective manner could affect our business.*

Our business model requires us to maintain a certain level of inventory to meet the present and future orders. If we underestimate the orders that we may receive we may experience inventory shortages and a loss of opportunity. Similarly, an over estimation of orders may result in over stocking leading to increased holding costs. Additionally, any over run in holding of such goods may lead to their decay. Therefore, any mismanagement on our part to determine the optimum inventory levels may impact our operations and cause us to incur losses.

23. *If our Company is unable to protect its intellectual property, or if our Company infringes on the intellectual property rights of others, our business may be adversely affected. In the event, any actions of our Company qualifies as a breach of any of the clauses of this deed, it could have a material impact on our goodwill, business operations, financial condition and results of operations.*

Our Company has created a brand presence with our brand-name “*Srivari*”. Our Company’s success largely depends on our brand name and brand image, therefore we have trademarked our brand logo differentiating our Company’s products from that of our competitors. Our current logo has been registered under the Trademarks Act, 1999. The details of the trademarks can be seen in the chapters titled, “**Our Business- ‘Intellectual Property Rights’**” and “**Government and other Statutory Approvals- ‘Intellectual Property Related Approvals’**” on pages 92 and 154 of this Prospectus.

We believe that there may be other companies or vendors which operate in the unorganized segment using our trade name or brand names. Any such activities may harm the reputation of our brand and sales of our products, which could in turn adversely affect our financial performance. We rely on protections available under Indian law, which may not be adequate to prevent unauthorized use of our intellectual property by third parties. Furthermore, the application of laws governing intellectual property rights in India is uncertain and evolving, and could involve substantial risks to us. Notwithstanding the precautions we take to protect our intellectual property rights, it is possible that third parties may copy or otherwise infringe on our rights, which may have an adverse effect on our business, results of operations, cash flows and financial condition. We may need to litigate third parties in order to prevent them from misusing our trademarks or brand names and any such litigation could be time consuming and the outcome cannot be guaranteed. We may not be able to detect any unauthorized use or take appropriate and timely steps to enforce or protect its intellectual property, which could adversely affect our business, results of operations and financial condition. For further details, please refer to the chapter titled “**Government and other Statutory Approvals**” on pages 154 of this Prospectus.

24. *We have significant power requirements for continuous running of our manufacturing units. Any disruption to our operations on account of interruption in power supply or any irregular or significant hike in power tariffs may have an effect on our business, results of operations and financial condition.*

Our manufacturing units significant electricity requirements and any interruption in the supply of power may temporarily disrupt our operations. Since, we have a high power consumption, any unexpected or unforeseen increase in the tariff rates can increase the operating cost of our manufacturing units and thereby cause an increase in the production cost which we may not be able to pass on to our customers. There are limited number of electricity providers in the areas from where we operate due to which in case of a price hike, we may not be able to find a cost-effective substitute, which may negatively affect our business, financial condition, cash flows and results of operations. For further details, please refer to the chapter titled “**Our Business**” on page 92 of this Prospectus.

25. *We operate in a competitive business environment and our inability to compete effectively may adversely affect our business, results of operations, financial condition and cash flows.*

The food and spices industry in India is competitive with both organized and unorganized markets. However, we are required to compete both in the domestic and international markets. We may be unable to compete with the prices and products offered by our competitors. We may have to compete with new players in India and abroad who enter the market and are able to offer competing products. Our competitors may have access to greater financial, manufacturing, research and development, marketing, distribution and other resources and more experience in obtaining the relevant regulatory approvals. Increasing competition may result in pricing pressures and decreasing profit margins or loss of market share or failure to improve our market position, any of which could substantially harm our business and results of operations. We cannot assure you that we will be able to compete with our existing as well as future competitors as well as the products prices and payment terms offered by them. In addition, our customers may enter into contract manufacturing arrangements with third parties, for products that they

are presently purchasing from us. Our failure to successfully face existing and future competitors may have an adverse impact on our business, growth and development.

Further, some of our competitors may be larger than we are or develop alliances to compete against us and may have greater resources, market presence and geographic reach and have products with better brand recognition than ours. Some of our competitors may be able to procure raw materials at lower costs than us, and consequently be able to sell their products at lower prices. As a result, our competitors may be able to withstand industry downturns better than us or provide customers with products at more competitive prices. Some of our international competitors may be able to capitalize on their overseas experience to compete in the Indian market. Consequently, we cannot assure you that we will be able to compete successfully in the future against our existing or potential competitors or that our business and results of operations will not be adversely affected by increased competition. We cannot assure you that we will be able to maintain our existing market share. Our competitors may significantly increase their marketing expenses to promote their brands and products, which may require us to similarly increase our advertising and marketing expenses and engage in effective pricing strategies, which we may not be able to pass on to our customers which in turn may have an adverse effect on our business, results of operations and financial condition. For further details, please see *“Industry Overview”* on page 82 of this Prospectus.

26. *Our Promoters, Directors and Key Managerial Personnel have interests in our Company other than reimbursement of expenses incurred or normal remuneration or benefits.*

Our Promoters, Directors and Key Managerial Personnel, may be deemed to be interested in our Company, in addition to the regular remuneration or benefits, reimbursements of expenses, Equity Shares held by them or their relatives, their dividend or bonus entitlement, benefits arising from their directorship in our Company. Our Promoters, Director and Key Managerial Personnel may also be interested to the extent of any transaction entered into by our Company with any other company or firm in which they are directors or partners. For further details please refer to the paragraphs titled — *“Interest of our Directors”* in the chapter titled — *“Our Management”*, the paragraphs titled — *“Interest of our Promoter and Other Interests and Disclosures”* in the chapter titled — *“Our Promoter and Promoter Group”*, *“Financial Indebtedness”* and *“Restated Financial Information”* on pages 116, 128, 136 and 134, respectively of this Prospectus.

There can be no assurance that our Promoters, Directors, Key Management Personnel will exercise their rights as shareholders to the benefit and best interest of our Company. Our Promoters and members of our Promoter Group will continue to exercise significant control over our Company, including being able to control the composition of our Board of Directors and determine decisions requiring simple or special majority voting of shareholders, and our other shareholders may be unable to affect the outcome of such voting. Our Directors and our Key Management Personnel may take or block actions with respect to our business, which may conflict with the best interests of our Company or that of minority shareholders.

27. *Our Promoters and members of the Promoter Group have significant control over the Company and have the ability to direct our business and affairs; their interests may conflict with your interests as a shareholder.*

Upon completion of this Issue, our Promoters and members of our Promoter Group will collectively hold 69.94% of the Equity share capital of our Company. As a result, our Promoters will have the ability to exercise significant influence over all matters requiring shareholders’ approval. Accordingly, our Promoters will continue to retain significant control, including being able to control the composition of our Board of Directors, determine decisions requiring simple or special majority voting of shareholders, undertaking sale of all or substantially all of our assets, timing and distribution of dividends and termination of appointment of our officers, and our other shareholders may be unable to affect the outcome of such voting. There can be no assurance that our Promoters will exercise their rights as shareholders to the benefit and best interests of our Company. Further, such control could delay, defer or prevent a change in control of our Company, impede a merger, consolidation, takeover or other business combination involving our Company, or discourage a potential acquirer from making a tender offer or otherwise attempting to obtain control of our Company even if it is in our Company’s best interest. The interests of our Promoters could conflict with the interests of our other equity shareholders, and our Promoters could make decisions that materially and adversely affect your investment in the Equity Shares.

28. *The average cost of acquisition of Equity Shares held by our Promoters could be lower than the Issue Price.*

Our Promoters’ average cost of acquisition of Equity Shares in our Company may be lower than the Issue Price which is proposed to be determined on a fixed price basis. For further details regarding average cost of acquisition of Equity Shares by our Promoters in our Company and build-up of Equity Shares by our Promoters in our Company, please refer to the chapter titled *“Capital Structure”* on page 59 of this Prospectus.

29. *Our future fund requirements, in the form of further issue of capital or securities and/or loans taken by us, may*

be prejudicial to the interest of the Shareholders depending upon the terms on which they are eventually raised.

We may require additional capital from time to time depending on our business needs. Any further issue of Equity Shares or convertible securities would dilute the shareholding of the existing Shareholders and such issuance may be done on terms and conditions, which may not be favourable to the then existing Shareholders. If such funds are raised in the form of loans or debt or preference shares, then it may substantially increase our fixed interest/dividend burden and decrease our cash flows, thus adversely affecting our business, results of operations and financial condition.

30. *We have in past entered into related party transactions and we may continue to do so in the future.*

As of March 31, 2023, we have entered into several related party transactions with our Promoters, individuals and entities forming a part of our promoter group relating to our operations. In addition, we have in the past also entered into transactions with other related parties. For further details, please refer to the chapter titled — “**Restated Financial Information**” at page 134.

While we believe that all our related party transactions have been conducted on an arm’s length basis, and we confirm that the related party transactions entered into by the company are in compliance with the relevant provisions of Companies Act and other applicable laws, we cannot assure you that we may not have achieved more favorable terms had such transactions been entered into with unrelated parties. There can be no assurance that such transactions, individually or taken together, will not have an adverse effect on our business, prospects, results of operations and financial condition, including because of potential conflicts of interest or otherwise. In addition, our business and growth prospects may decline if we cannot benefit from our relationships with them in the future.

31. *Our Promoter has extended personal guarantees with respect to various loan facilities availed by our Company. Revocation of any or all of these personal guarantees may adversely affect our business operations and financial condition.*

Our Promoter has extended certain personal guarantees in favour of certain banks / financial institutions with respect to various facilities availed by our Company from them. In the event any of these guarantees are revoked, our lenders may require us to furnish alternate guarantees or may demand a repayment of the outstanding amounts under the said facilities sanctioned or may even terminate the facilities sanctioned to us. There can be no assurance that our Company will be able to arrange such alternative guarantees in a timely manner or at all. Further, if our lenders enforce any of the restrictive covenants or exercise their options under the relevant debt financing arrangement, our operations and use of assets may be significantly hampered and lenders may demand the payment of the entire outstanding amount and this in turn may also affect our further borrowing abilities thereby adversely affecting our business and operations. For further details please refer to the chapter titled “**Financial Indebtedness**” on page 136 of this Prospectus.

32. *Our agreements with lenders for financial arrangements contain restrictive covenants for certain activities and if we are unable to get their approval, it might restrict our scope of activities and impede our growth plans.*

We have entered into agreements for our borrowings with certain lenders. These borrowings include secured fund based and non-fund based facilities. These agreements include restrictive covenants which mandate certain restrictions in terms of our business operations such as change in capital structure, formulation of any scheme of amalgamation or reconstruction, declaring dividends, further expansion of business, granting loans to directors, repaying unsecured loans from third parties, undertake guarantee obligations on behalf of any other borrower, which require our Company to obtain prior approval of the lenders for any of the above activities. We cannot assure you that our lenders will provide us with these approvals in the future. For details of these restrictive covenants, please refer to chapter titled — “**Financial Indebtedness**” on page 136 of this Prospectus.

Further, some of our financing arrangements include covenants to maintain our total outside liabilities and total net worth up to a certain limit and certain other liquidity ratios. We cannot assure prospective investors that such covenants will not hinder our business development and growth in the future. A default under one of these financing agreements may also result in cross-defaults under other financing agreements and result in the outstanding amounts under such financing agreements becoming due and payable immediately. Defaults under one or more of our Company’s financing agreements may limit our flexibility in operating our business, which could have an adverse effect on our cash flows, business, results of operations and financial condition.

It may be possible for a lender to assert that we have not complied with all applicable terms under our existing financing documents. Further we cannot assure that we will have adequate funds at all times to repay these credit facilities and may also be subject to demands for the payment of penal interest.

33. *Stringent food safety, consumer goods, health and safety laws and regulations may result in increased liabilities and increased capital expenditures.*

Our operations are subject to stringent health and safety laws as our products are for human consumption and are therefore subject to various industry specific regulations. We may also be subject to additional regulatory requirements due to changes in governmental policies. Further, we may also incur additional costs and liabilities related to compliance with these laws and regulations that are an inherent part of our business. We are subject to various central, state and local food safety, consumer goods, health and safety and other laws and regulations. These laws and regulations are increasingly becoming stringent and may in the future create substantial compliance or remediation liabilities and costs. These laws may impose liability for non-compliance, regardless of fault. Other laws may require us to investigate and remediate contamination at our facilities and production processes. While we intend to comply with applicable regulatory requirements, it is possible that such compliance may prove restrictive, costly and onerous and an inability to comply with such regulatory requirement may attract penalty. For details see, **“Government and Other Approvals”** beginning on page 154.

34. *In addition to our existing indebtedness for our existing operations, we may incur further indebtedness during the course of business. We cannot assure that we would be able to service our existing and/ or additional indebtedness.*

For the Financial Year ended on March 31, 2023 our Company’s total outstanding secured loans are ₹ 997.82 lacs. In addition to the indebtedness for our existing operations, we may incur further indebtedness during the course of our business. We cannot assure you that we will be able to obtain further loans at favourable terms. Increased borrowings, if any, may adversely affect our debt-equity ratio and our ability to borrow at competitive rates. In addition, we cannot assure you that the budgeting of our working capital requirements for a particular year will be accurate. There may be situations where we may under-budget our working capital requirements, which may lead to delays in arranging additional working capital requirements, loss of reputation, levy of liquidated damages and can cause an adverse effect on our cash flows.

Any failure to service our indebtedness or otherwise perform our obligations under our financing agreements entered with our lenders or which may be entered into by our Company, could trigger cross default provisions, penalties, acceleration of repayment of amounts due under such facilities which may cause an adverse effect on our business, financial condition and results of operations. For details of our indebtedness, please refer to the chapter titled — **“Financial Indebtedness”** on page 136 of this Prospectus.

We meet our capital requirements through our bank finance, unsecured loans, owned funds and internal accruals. Any shortfall in our net owned funds, internal accruals and our inability to raise debt in future would result in us being unable to meet our capital requirements, which in turn will negatively affect our financial condition and results of operations. Further, we have not identified any alternate source of funding and hence any failure or delay on our part to raise money from this issue or any shortfall in the issue proceeds may delay the implementation schedule and could adversely affect our growth plans. For further details, please refer to the chapter titled **“Objects of the Issue”** beginning on page 69 of this Prospectus.

We cannot assure you that we will be successful in recruiting and retaining a sufficient number of personnel with the requisite skills to replace those Key Managerial Personnel who leave. In the event we are unable to motivate and retain our key managerial personnel and thereby lose the services of our highly skilled Key Managerial Personnel may adversely affect the operations, financial condition and profitability of our Company and thereby hampering and adversely affecting our ability to expand our business. 45. *Our inability to procure and/or maintain adequate insurance cover in connection with our business may adversely affect our operations and profitability.*

Our operations are subject to inherent risks and hazards which may adversely impact our profitability, such as breakdown, malfunctions, sub-standard performance or failures of manufacturing equipment, fire, riots, third party liability claims, loss-in-transit for our products, accidents and natural disasters. Presently, we maintain insurance cover for insuring our plant and machinery situated at our manufacturing units against loss or damage by fire, earthquake, terrorism, spoilage, impact damage due to road or rail services, *etc.* There are many events that could cause significant damages to our operations, or expose us to third-party liabilities, whether or not known to us, for which we may not be insured or adequately insured, which in turn may expose us to certain risks and liabilities. Our business and the industry in which we operate are vulnerable to the problem of pilferage by employees, damage, misappropriation of cash and inventory management and logistical errors. An increase in product losses due to such factors at our place of operation may require us to install additional security and surveillance equipment and incur additional expenses towards inventory management and handling. We cannot assure you whether these measures will successfully prevent such losses. Further, there are inherent risks in cash management as part of our operations, which include theft and robbery, employee fraud and the risks involved in transferring cash to banks. Additionally, in case of losses due to theft, financial misappropriation, fire, breakage or damage caused by other casualties, we cannot assure you that we will be able to recover from our insurers the full amount of any such loss in a timely manner, or at all. In addition, if we file claims under an insurance policy it could lead to increases in the insurance premiums payable by us or the termination of coverage under the relevant policy.

48. *The deployment of funds is entirely at our discretion and as per the details mentioned in the chapter titled “Objects of the Issue”.*

As the issue size shall be less than ₹10,000 lacs, under Regulation 262 of the SEBI ICDR Regulations it is not required that a monitoring agency be appointed by our Company, for overseeing the deployment and utilization of funds raised through this Issue. Therefore, the deployment of the funds towards the Objects of this Issue is entirely at the discretion of our Board of Directors and is not subject to monitoring by external independent agency. Our Board of Directors along with the Audit Committee will monitor the utilization of Issue proceeds and shall have the flexibility in applying the proceeds of this Issue. 49. *We have not independently verified certain data in this Prospectus.*

We have not independently verified data from the Industry and related data contained in this Prospectus. Such data may also be produced on a different basis from comparable information compiled with regards to other countries. Therefore, discussions of matters relating to India, its economy or the industries in which we operate that is included herein are subject to the caveat that the statistical and other data upon which such discussions are based have not been verified by us and may be incomplete, inaccurate or unreliable. Due to incorrect or ineffective data collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced elsewhere and should not be unduly relied upon. Further, we cannot assure you that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere.

50. *The requirements of being a listed company may strain our resources.*

We are not a listed Company and have not, historically, been subjected to the increased scrutiny of our affairs by shareholders, regulators and the public at large that is associated with being a listed company. As a listed company, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur as an unlisted company. We will be subject to the listing agreements with the Stock Exchanges and compliances of SEBI (LODR) Regulations which will require us to file audited annual and unaudited half yearly results and limited review reports with respect to our business and financial condition. If we experience any delays, we may fail to satisfy our reporting obligations and/or we may not be able to readily determine and accordingly report any changes in our results of operations as promptly as other listed companies which may adversely affect the financial position of the Company.

As a listed company, we will need to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, including keeping adequate records of daily transactions to support the existence of effective disclosure controls and procedures, internal control over financial reporting and additional compliance requirements under the Companies Act, 2013. In order to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, significant resources and management oversight will be required. As a result, management’s attention may be diverted from other business concerns, which could adversely affect our business, prospects, financial condition and results of operations. In addition, we may need to hire additional legal and accounting staff with appropriate listed company experience and technical accounting knowledge and we cannot assure you that we will be able to do so in a timely manner.

51. *The Equity Shares have never been publicly traded and the Issue may not result in an active or liquid market for the Equity Shares.*

Prior to the Issue, there has been no public market for the Equity Shares, and an active trading market on the Stock Exchanges may not develop or be sustained after the Issue. Listing and quotation does not guarantee that a market for the Equity Shares will develop, or if developed, the liquidity of such market for the Equity Shares. Although we currently intend that the Equity Shares will remain listed on the Stock Exchanges, there is no guarantee of the continued listing of the Equity Shares. Failure to maintain our listing on the Stock Exchanges or other securities markets could adversely affect the market value of the Equity Shares.

The Issue Price of the Equity Shares is proposed to be determined through a fixed price process in accordance with the SEBI ICDR Regulations and may not be indicative of the market price of the Equity Shares at the time of commencement of trading of the Equity Shares or at any time thereafter. The market price of the Equity Shares may be subject to significant fluctuations in response to, among other factors, variations in our operating results of our

Company, market conditions specific to the industry we operate in, developments relating to India, volatility in securities markets in jurisdictions other than India, variations in the growth rate of financial indicators, variations in revenue or earnings estimates by research publications, and changes in economic, legal and other regulatory factors. You may not be able to resell your Equity Shares at a price that is attractive to you.

52. *There is no guarantee that the Equity Shares issued pursuant to the Issue will be listed on the SME Platform of National Stock Exchange of India Limited in a timely manner or at all.*

In accordance with Indian law and practice, permission for listing and trading of the Equity Shares issued pursuant to the Issue will not be granted until after the Equity Shares have been issued and allotted. Approval for listing and trading will require all relevant documents authorizing the issuance of Equity Shares to be submitted. There could be a failure or delay in listing the Equity Shares on the SME Platform of National Stock Exchange of India Limited due to delay in submission of required documents/ completion of formalities/compliance with required laws by the issuer. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares.

53. *There is no existing market for our Equity Shares, and we do not know if one will develop to provide you with adequate liquidity. Further, an active trading market for the Equity Shares may not develop and the price of the Equity Shares may be volatile.*

An active public trading market for the Equity Shares may not develop or, if it develops, may not be maintained after the Issue. Our Company, in consultation with the lead manager, will determine the Issue Price. The Issue Price may be higher than the trading price of our Equity Shares following this Issue. As a result, investors may not be able to sell their Equity Shares at or above the Issue Price or at the time that they would like to sell. The trading price of the Equity Shares after the Issue may be subject to significant fluctuations in response to factors such as, variations in our results of operations, market conditions specific to the sectors in which we operate economic conditions of India and volatility of the securities markets elsewhere in the world.

54. *The price of the Equity Shares may be highly volatile after the Issue.*

The price of the Equity Shares on the Indian stock exchanges may fluctuate after this Issue as a result of several factors, including, volatility in the Indian and global securities market; our operations and performance; performance of our competitors and the perception in the market about investments in the our industry; adverse media reports on us or the industry; changes in the estimates of our performance or recommendations by financial analysts; significant developments in India's economic liberalization and deregulation policies; and significant developments in India's fiscal and environmental regulations. There can be no assurance that the prices at which the Equity Shares are initially traded will correspond to the prices at which the Equity Shares will trade in the market subsequently.

55. *You will not be able to sell immediately on the Stock Exchanges any of the Equity Shares you purchase in the Issue.*

The Equity Shares will be listed on the Emerge Platform of National Stock Exchange of India Limited. Pursuant to Indian regulations, certain actions must be completed before the Equity Shares can be listed and trading may commence. Upon receipt of final approval from the Stock Exchanges, trading in the Equity Shares is to commence within six (6) working days of the date of closure of the Issue or such other time as may be prescribed by SEBI.

We cannot assure that the Equity Shares will be credited to investors' demat accounts, or that trading in the Equity Shares will commence, within the time period prescribed by law. Further, there can be no assurance that the Equity Shares to be Allotted pursuant to this Issue will be listed on the Stock Exchanges in a timely manner or at all.

56. *There are restrictions on daily movements in the trading price of the Equity Shares, which may adversely affect a shareholder's ability to sell Equity Shares or the price at which Equity Shares can be sold at a particular point in time.*

Our listed Equity Shares will be subject to a daily "circuit breaker" imposed on listed companies by the Stock Exchanges, which does not allow transactions beyond certain volatility in the trading price of the Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by SEBI on Indian stock exchanges. The percentage limit on the Equity Shares' circuit breaker will be set by the Stock Exchanges based on historical volatility in the price and trading volume of the Equity Shares. The Stock Exchanges are not required to inform our Company of the percentage limit of the circuit breaker, and they may change the limit without our knowledge. This circuit breaker would effectively limit the upward and downward movements in the trading price of the Equity Shares. As a result of this circuit breaker, there can be no assurance regarding the ability of shareholders to sell Equity Shares or the price at which shareholders may be able to sell their Equity Shares.

57. *The price of the Equity Shares may be volatile, which could result in substantial losses for investors acquiring the Equity Shares in the Issue.*

The market price of the Equity Shares may be volatile and could fluctuate significantly and rapidly in response to, among others, the following factors, some of which are beyond our control:

- volatility in the Indian and global securities market or in the value of the Rupee relative to the U.S. Dollar, the Euro and other foreign currencies;
- our profitability and performance;
- changes in financial analysts' estimates of our performance or recommendations;
- perceptions about our future performance or the performance of Indian companies in general;
- performance of our competitors and the perception in the market about investments in the real estate sector;
- adverse media reports about us or the Indian real estate sector;
- significant developments in India's economic liberalization and deregulation policies;
- significant developments in India's fiscal and environmental regulations;
- economic developments in India and in other countries; and
- any other political or economic factors.

These fluctuations may be exaggerated if the trading volume of the Equity Shares is low. Volatility in the price of the Equity Shares may be unrelated or disproportionate to our results of operations. It may be difficult to assess our performance against either domestic or international benchmarks.

Indian stock exchanges, including the Stock Exchanges, have experienced substantial fluctuations in the prices of listed securities and problems such as temporary exchange closures, broker defaults, settlement delays and strikes by brokers. The governing bodies of Indian stock exchanges have also, from time to time, imposed restrictions on trading in certain securities, limitations on price movements and margin requirements. Further, disputes have occurred between listed companies, stock exchanges and other regulatory bodies, which in some cases may have had a negative effect on market sentiment. If such or similar problems were to continue or recur, they could affect the market price and liquidity of the securities of Indian companies, including the Equity Shares.

58. *Any future issuance of Equity Shares, or convertible securities or other equity-linked securities by our Company may dilute your shareholding and any sale of Equity Shares by our Promoters or members of our Promoter Group may adversely affect the trading price of the Equity Shares.*

Any future issuance of the Equity Shares, convertible securities or securities linked to the Equity Shares by our Company may dilute your shareholding in our Company; adversely affect the trading price of the Equity Shares and our ability to raise capital through further issue of our securities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of the Equity Shares. We cannot assure you that we will not issue additional Equity Shares. The disposal of Equity Shares by any of our Promoters and Promoter Group, or the perception that such sales may occur may significantly affect the trading price of the Equity Shares. We cannot assure you that our Promoters and Promoter Group will not dispose of, pledge or encumber their Equity Shares in the future.

59. *Sale of Equity Shares by our Promoters or other significant shareholder(s) may adversely affect the trading price of the Equity Shares.*

Any instance of disinvestments of Equity Shares by our Promoters or by other significant shareholder(s) may significantly affect the trading price of our Equity Shares. Further, our market price may also be adversely affected even if there is a perception or belief that such sale of Equity Shares might occur.

60. *Rights of shareholders under Indian laws may be more limited than under the laws of other jurisdictions.*

Indian legal principles related to corporate procedures, directors' fiduciary duties and liabilities, and shareholders' rights may differ from those that would apply to a company in another jurisdiction. Shareholders' rights including in relation to class actions, under Indian law may not be as extensive as shareholders' rights under the laws of other countries or jurisdictions. Investors may have more difficulty in asserting their rights as shareholder in an Indian company than as shareholder of a corporation in another jurisdiction.

EXTERNAL RISK FACTORS

61. Changing laws, rules and regulations and legal uncertainties, including adverse application of tax laws, may adversely affect our business and financial performance.

The regulatory and policy environment in which we operate is evolving and subject to change. Such changes may adversely affect our business, results of operations and prospects, to the extent that we are unable to suitably respond to and comply with any such changes in applicable law and policy. For example, the Government of India implemented a comprehensive national goods and services tax (“**GST**”) regime with effect from July 1, 2017, that combined multiple taxes and levies by the Central and State Governments into a unified tax structure. Our business and financial performance could be adversely affected by any unexpected or onerous requirements or regulations resulting from the amendment of GST or any changes in laws or interpretation of existing laws, or the promulgation of new laws, rules and regulations relating to GST. The Government has enacted the GAAR which have come into effect from April 1, 2017.

The Government of India has announced the union budget for Fiscal 2024 and the Ministry of Finance has notified the Finance Act, 2023 (“**Finance Act**”). There is no certainty on the impact that the Finance Act may have on our business and operations or on the industry in which we operate. We cannot predict whether any amendments made pursuant to the Finance Act would have a material adverse effect on our business, financial condition and results of operations. Unfavourable changes in or interpretations of existing, or the promulgation of new, laws, rules and regulations including foreign investment and stamp duty laws governing our business and operations could result in us being deemed to be in contravention of such laws and may require us to apply for additional approvals. For instance, the Supreme Court of India has, in a decision clarified the components of basic wages, which need to be considered by companies while making provident fund payments. Our Company has not made relevant provisions for the same, as on date. Any such decisions in future or any further changes in interpretation of laws may have an impact on our results of operations. Further, the Personal Data Protection Bill, 2019 (“**PDP Bill**”) was introduced to propose a legal framework governing the processing of personal data. However, the PDP Bill has been withdrawn on August 3, 2022 and the Ministry of Electronics and Information Technology, Government of India (“**MoEIT**”) has submitted a new Digital Personal Data Protection Bill, 2022 before the Parliament.

We may incur increased costs and other burdens relating to compliance with such new requirements, which may also require significant management time and other resources, and any failure to comply may adversely affect our business, results of operations and prospects. Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may impact the viability of our current businesses or restrict our ability to grow our businesses in the future.

62. Changes in interest rates in India could adversely affect our business and the market for our real estate developments.

Our results of operations, and the purchasing power of our real estate customers, are substantially affected by prevailing interest rates and the availability of credit in the Indian economy. Interest rates in India have fluctuated over the last few years. Our ability to borrow funds for the development of our real estate projects is affected in part by the prevailing interest rates available to us from leading Indian banks. Changes in prevailing interest rates affect our interest expense in respect of our future borrowings, and our interest income in respect of our interest on short-term deposits with banks and loans to associates. Significantly, the interest rate at which we may borrow funds, and the availability of capital to us for development purposes, affects our results of operations by limiting or facilitating the number of projects we may undertake and determining the return which we must obtain from each project to meet our obligations under our borrowings.

Changes in interest rates also affect the ability and willingness of our prospective real estate customers, particularly the customers for our residential properties, to obtain financing for their purchases of our completed developments. The interest rate at which our real estate customers may borrow funds for the purchase of our properties affects the affordability and purchasing power of, and hence the demand for, our real estate developments.

There can be no assurance that variations in interest rates and interest rate policy by the RBI will not adversely affect our financial condition and results of operations.

63. Our business is substantially affected by prevailing economic conditions in India.

We perform all of our real estate development activities in India, our business activities and manufacturing units are located in Hyderabad, India, and the predominant portions of our customers are Indian nationals. As a result, we are

highly dependent on prevailing economic conditions in India and our results of operation are significantly affected by factors influencing the Indian economy. Factors that may adversely affect the Indian economy, and hence our results of operations, include:

- any increase in Indian interest rates or inflation;
- any scarcity of credit or other financing in India, resulting in an adverse impact on economic conditions in India and scarcity of financing of our real estate developments and the purchase thereof by our customers;
- prevailing income conditions among Indian consumers and Indian corporations;
- changes in India's present tax, trade, fiscal or monetary policies;
- natural disasters, political instability, communal disturbances, riots, civil unrest, terrorism or military conflict in India or in countries in the region or globally, including in India's various neighboring countries;
- prevailing national, regional or global economic conditions, including in India's principal export markets; and
- other significant regulatory or economic developments in or affecting India or its real estate development sector.

In addition to the factors set forth above, our business may be affected by adverse changes specific to the residential, and office space real estate markets. Demand in the residential real estate market may be adversely affected by changes such as a decrease in disposable income or a rise in residential mortgage rates or a decline in the population. Demand for our office space developments may be adversely affected by deteriorating economic conditions that could prompt current and potential tenants to place any expansion plans on hold or to search for locations with lower rental rates.

64. *Foreign investors are subject to foreign investment restrictions under Indian law.*

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the sale of shares is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection or a tax clearance certificate from the income tax authority. We cannot assure you that any required approval from the RBI or any other Government agency can be obtained on any particular terms or at all.

65. *Any downgrading of India's debt rating by an independent agency may harm our ability to raise financing.*

Any adverse revisions to India's credit ratings international debt by international rating agencies may adversely affect our ability to raise additional overseas financing and the interest rates and other commercial terms at which such additional financing is available. This could have an adverse effect on our ability to fund our growth on favourable terms or at all, and consequently adversely affect our business and financial performance and the price of our Equity Shares.

66. *Political instability or a change in economic liberalization and deregulation policies could seriously harm business and economic conditions in India generally and our business in particular.*

The Government of India has traditionally exercised and continues to exercise influence over many aspects of the economy. Our business and the market price and liquidity of our Equity Shares may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. The rate of economic liberalization could change, and specific laws and policies affecting the information technology sector, foreign investment and other matters affecting investment in our securities could change as well. Any significant change in such liberalization and deregulation policies could adversely affect business and economic conditions in India, generally, and our business, prospects, financial condition and results of operations, in particular.

67. *Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.*

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance of our business. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in commodities markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence and spending. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency and magnitude, which may negatively affect our stock prices.

68. *Natural calamities could have a negative impact on the Indian economy and cause our business to suffer.*

India has experienced natural calamities such as earthquakes, tsunami, floods etc. In recent years, the extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

69. *Terrorist attacks, civil unrests and other acts of violence or war involving India or other countries could adversely affect the financial markets, our business, financial condition and the price of our Equity Shares.*

Any major hostilities involving India or other acts of violence, including civil unrest or similar events that are beyond our control, could have a material adverse effect on India's economy and our business. Incidents such as the terrorist attacks, other incidents such as those in US, Indonesia, Madrid and London, and other acts of violence may adversely affect the Indian stock markets where our Equity Shares will trade as well as the global equity markets generally. Such acts could negatively impact business sentiment as well as trade between countries, which could adversely affect our Company's business and profitability. Additionally, such events could have a material adverse effect on the market for securities of Indian companies, including the Equity Shares.

For further details on the method and procedure for Bidding, please see section entitled “*Issue Procedure*” on page 181 of this Prospectus.

Illustration of the Book Building and Price Discovery Process: Bidders should note that this example is solely for illustrative purposes and is not specific to the Issue; it also excludes Bidding by Anchor Investors. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹20 to ₹ 24 per share, Issue size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Issue the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹ 22.00 in the above example. The Company in consultation with the BRLM, may finalise the Issue Price at or below such Cut-Off Price, i.e., at or below ₹ 22.00. All Bids at or above this Issue Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.

Details of the Objects

1. Funding the working capital requirements of our Company

Our Company proposes to utilise ₹ 592.52 lakhs from the Net Proceeds towards funding its working capital requirements in Fiscal 2024.

We have significant working capital requirements, and we fund our working capital requirements in the ordinary course of business from our internal accruals/equity and financing facilities from various banks, financial institutions and non-banking financial companies. Our Company requires additional working capital for funding future growth requirements of our Company. As of March 31, 2023, the aggregate amount sanctioned by the banks to our Company under the fund based working capital facilities amounted to ₹ 716.75 lakhs on a standalone basis. For details of the working capital facilities availed by us, see “*Financial Indebtedness*” on page 136.

The company's year-on-year increase in working capital is due to two main factors:

Increased in Procurement of the Raw Material Level: The Company has expanded its customer base and product portfolio every year as part of its growth strategy. This expansion has resulted in a longer production cycle, leading to an increase in raw material levels over the past three years. Additionally, over the past two years, the lead time for procuring materials has increased due to disruptions in the global supply chain, which has compelled the company to increase its raw materials holding levels.

Increased in receivables: Over the past three years, the company has gained new customers, resulting in an increase in receivables due to varying payment terms. To address this, the company has estimated a debtors' realization period of approximately two months starting from FY23.

The company is taking steps to manage its working capital more effectively, such as by improving its inventory management and by negotiating more favorable payment terms with its suppliers. However, the company's working capital is likely to remain elevated in the near term as it continues to grow.

Key assumptions for working capital requirements

Our Company's estimated working capital requirements on a standalone basis are based on the following key assumptions:

S. No.	Particulars	Assumptions
Current Assets		
1	Trade Receivables	The historical holding days of Trade Receivables has been in the range of 27 to 75 days in the last three financial years, with average Trade Receivables days of 51 days in the last three financial years. As per the current credit terms of the Company and prevalent trend in the business of the Company, the holding level for receivables anticipated at 114 days of total gross sales during FY2022-23 and 144 days of total gross sales during FY2023-24.
2	Inventories	The historical holding days of inventories has been in the range of 20 to 66 days in the last three financial years. Our Company estimates inventory holding days at around 85 days in FY 2022-23 and around 92 days in FY 2023-24 This seems to be reasonable in view of the lead time of procurement of raw materials, process cycle time and lifting time taken by the customers. Also, it seems to be reasonable considering the nature and volume of business activity of the Company.
Current Liabilities		
1	Trade Payables	We intend to decrease the credit period expected from our Creditors due to fulfillment of our working capital requirements through our proposed initial public issue. This will help us in better negotiations and maintaining sound business relations with our creditors.

SECTION V – ABOUT THE COMPANY

INDUSTRY OVERVIEW

GLOBAL ECONOMY

Global growth is projected to fall from an estimated 3.4 percent in 2022 to 2.9 percent in 2023, then rise to 3.1 percent in 2024. The forecast for 2023 is 0.2 percentage point higher than predicted in the October 2022 World Economic Outlook (WEO) but below the historical (2000–19) average of 3.8 percent. The rise in central bank rates to fight inflation and Russia’s war in Ukraine continue to weigh on economic activity. The rapid spread of COVID-19 in China dampened growth in 2022, but the recent reopening has paved the way for a faster-than-expected recovery. Global inflation is expected to fall from 8.8 percent in 2022 to 6.6 percent in 2023 and 4.3 percent in 2024, still above pre-pandemic (2017–19) levels of about 3.5 percent.

The balance of risks remains tilted to the downside, but adverse risks have moderated since the October 2022 WEO. On the upside, a stronger boost from pent-up demand in numerous economies or a faster fall in inflation is plausible. On the downside, severe health outcomes in China could hold back the recovery, Russia’s war in Ukraine could escalate, and tighter global financing conditions could worsen debt distress. Financial markets could also suddenly reprice in response to adverse inflation news, while further geopolitical fragmentation could hamper economic progress.

In most economies, amid the cost-of-living crisis, the priority remains to achieve sustained disinflation. With tighter monetary conditions and lower growth potentially affecting financial and debt stability, it is necessary to deploy macro-prudential tools and strengthen debt restructuring frameworks. Accelerating COVID-19 vaccinations in China would safeguard the recovery, with positive cross-border spillovers. Fiscal support should be better targeted at those most affected by elevated food and energy prices, and broad-based fiscal relief measures should be withdrawn.

Emerging Market and Developing Economies

For emerging market and developing economies, growth is projected to rise modestly, from 3.9 percent in 2022 to 4.0 percent in 2023 and 4.2 percent in 2024, with an upward revision of 0.3 percentage point for 2023 and a downward revision of 0.1 percentage point for 2024. About half of emerging market and developing economies have lower growth in 2023 than in 2022.

Growth in emerging and developing Asia is expected to rise in 2023 and 2024 to 5.3 percent and 5.2 percent, respectively, after the deeper-than-expected slowdown in 2022 to 4.3 percent attributable to China’s economy. China’s real GDP slowdown in the fourth quarter of 2022 implies a 0.2 percentage point downgrade for 2022 growth to 3.0 percent—the first time in more than 40 years with China’s growth is below the global average. Growth in China is projected to rise to 5.2 percent in 2023, reflecting rapidly improving mobility, and to fall to 4.5 percent in 2024 before settling at below 4 percent

over the medium term amid declining business dynamism and slow progress on structural reforms. Growth in India is set to decline from 6.8 percent in 2022 to 6.1 percent in 2023 before picking up to 6.8 percent in 2024, with resilient domestic demand despite external headwinds. Growth in the ASEAN-5 countries (Indonesia, Malaysia, Philippines, Singapore, and Thailand) is similarly projected to slow to 4.3 percent in 2023 and then pick up to 4.7 percent in 2024.

OVERVIEW OF THE INDIAN ECONOMY

The Indian economy was impacted by the global pandemic caused by COVID-19 and still recovering from the impact of this virus. Economic growth hindered in the last year and businesses are still trying to recover from the downfall caused due to the pandemic in 2020. The real Gross Domestic Product (GDP) growth is projected to contract in 2020-21 as compared to strong growth in 2019-20. GDP growth, however, is expected to rebound strongly in 2021-22 owing to the reform measures undertaken by the Government.

Strong economic growth in the first quarter of FY 2022-23 helped India overcome the UK to become the fifth-largest economy after it recovered from repeated waves of the COVID-19 pandemic shock. Real GDP in the first quarter of 2022-23 is currently about 4% higher than its corresponding 2019-20, indicating a strong start for India's recovery from the

pandemic. Given the release of pent-up demand and the widespread vaccination coverage, the contact-intensive services sector will probably be the main driver of development in 2022–2023. Rising employment and substantially increasing private consumption, supported by rising consumer sentiment, will support GDP growth in the coming months.

Future capital spending of the government in the economy is expected to be supported by factors such as tax buoyancy, the streamlined tax system with low rates, a thorough assessment and rationalization of the tariff structure, and the digitization of tax filing. In the medium run, increased capital spending on infrastructure and asset-building projects is set to increase growth multipliers, and with the revival in monsoon and the Kharif sowing, agriculture is also picking up momentum. The contact-based services sector has largely demonstrated promise to boost growth by unleashing the pent-up demand over the period of April-September 2022. The sector's success is being captured by a number of HFIs (High-Frequency Indicators) that are performing well, indicating the beginnings of a comeback.

India has emerged as the fastest-growing major economy in the world and is expected to be one of the top three economic powers in the world over the next 10-15 years, backed by its robust democracy and strong partnerships.

India’s nominal gross domestic product (GDP) at current prices is estimated to be at rs. 232.15 trillion (US\$ 3.12 trillion) in FY22. With more than 100 unicorns valued at US\$ 332.7 billion, India has the third-largest unicorn base in the world. The government is also focusing on renewable sources to generate energy and is planning to achieve 40% of its energy from non-fossil sources by 2030.

According to the McKinsey Global Institute, India needs to boost its rate of employment growth and create 90 million non-farm jobs between 2023 and 2030 in order to increase productivity and economic growth. The net employment rate needs to grow by 1.5% per annum from 2023 to 2030 to achieve 8-8.5% GDP growth between 2023 and 2030. India’s current account deficit (CAD), primarily driven by an increase in the trade deficit, stood at 2.1% of GDP in the first quarter of FY 2022-23.

Exports fared remarkably well during the pandemic and aided recovery when all other growth engines were losing steam in terms of their contribution to GDP. Going forward, the contribution of merchandise exports may waver as several of India’s trade partners witness an economic slowdown. According to Mr. Piyush Goyal, Minister of Commerce and Industry, Consumer Affairs, Food, Public Distribution, and Textiles, Indian exports are expected to reach US\$ 1 trillion by 2030.

Road Ahead

In the second quarter of FY 2022-23, the growth momentum of the first quarter was sustained, and high-frequency indicators (HFIs) performed well in July and August of 2022. India's comparatively strong position in the external sector reflects the country's generally positive outlook for economic growth and rising employment rates. India ranked fifth in foreign direct investment inflows among the developed and developing nations listed for the first quarter of 2022.

India's economic story during the first half of the current financial year highlighted the unwavering support the government gave to its capital expenditure, which, in FY 2022–23 (until August 2022), stood 46.8% higher than the same period last year. The ratio of revenue expenditure to capital outlay decreased from 6.4 in the previous year to 4.5 in the current year, signaling a clear change in favor of higher-quality spending. Stronger revenue generation as a result of improved tax compliance, increased profitability of the company, and increasing economic activity also contributed to rising capital spending levels.

Despite the continued global slowdown, India's exports climbed at the second-highest rate this quarter. With a reduction in port congestion, supply networks are being restored. The CPI-C and WPI inflation reduction from April 2022 already reflects the impact. In August 2022, CPI-C inflation was 7.0%, down from 7.8% in April 2022. Similarly, WPI inflation has decreased from 15.4% in April 2022 to 12.4% in August 2022. With a proactive set of administrative actions by the government, flexible monetary policy, and a softening of global commodity prices and supply-chain bottlenecks, inflationary pressures in India look to be on the decline overall.

INDIAN FMCG INDUSTRY

The fast-moving consumer goods (FMCG) sector is India's fourth-largest sector and has been expanding at a healthy rate over the years as a result of rising disposable income, a rising youth population, and rising brand awareness among consumers. With household and personal care accounting for 50% of FMCG sales in India, the industry is an important contributor to India's GDP.

India is a country that no FMCG player can afford to ignore due to its middle-class population which is larger than the total population of the USA. The Indian FMCG market continues to rise as more people start to move up the economic ladder and the benefits of economic progress become accessible to the general public. More crucially, with a median age of just 27, India's population is becoming more consumerist due to rising ambitions. This has been further aided by government initiatives to increase financial inclusion and establish social safety nets.

Growing awareness, easier access, and changing lifestyles have been the key growth drivers for the sector. The urban segment (which accounts for a revenue share of around 55%) is the largest contributor to the overall revenue generated by the FMCG sector in India. However, in the last few years, the FMCG market has grown at a faster pace in rural India

compared to urban India. Semi-urban and rural segments are growing at a rapid pace and FMCG products account for 50% of the total rural spending.

FMCG giants such as Johnson & Johnson, Himalaya, Hindustan Unilever, ITC, Lakmé, and other companies (that have dominated the Indian market for decades) are now competing with D2C-focused start-ups such as Mamaearth, The Moms Co., Bey Bee, Azah, Nua and Pee Safe. Market giants such as Revlon and Lotus took ~20 years to reach the Rs. 100 crore (US\$ 13.4 million) revenue mark, while new-age D2C brands such as Mamaearth and Sugar took four and eight years, respectively, to achieve that milestone.

Advertising volumes on television recorded healthy growth in the July-September quarter, registering 461 million seconds of advertising, which is the highest in 2021. FMCG continued to maintain its leadership position with a 29% growth in ad volumes against the same period in 2019. Even the e-commerce sector showed a healthy 26% jump over 2020.

Rural consumption has increased, led by a combination of increasing income and higher aspiration levels. There is an increased demand for branded products in rural India. On the other hand, with the share of the unorganized market in the FMCG sector falling, the organized sector growth is expected to rise with an increased level of brand consciousness, augmented by the growth in modern retail. Another major factor propelling the demand for food services in India is the growing youth population, primarily in urban regions. India has a large base of young consumers who form the majority of the workforce, and due to time constraints, barely get time for cooking. Online portals are expected to play a key role for companies trying to enter the hinterlands. The Internet has contributed in a big way, facilitating a cheaper and more convenient mode to increase a company's reach. The number of internet users in India is likely to reach 1 billion by 2025. It is estimated that 40% of all FMCG consumption in India will be made online by 2020. E-commerce share of total FMCG sales is expected to increase by 11% by 2030. It is estimated that India will gain US\$ 15 billion a year by implementing GST. GST and demonetization are expected to drive demand, both in the rural and urban areas and economic growth in a structured manner in the long term and improved the performance of companies within the sector.

INDIAN SPICE INDUSTRY

Overview

India is the world's largest spice producer. It is also the largest consumer and exporter of spices. The production of different spices has been growing rapidly over the last few years. Production in 2021-22 stood at 10.88 million tonnes. During 2020-21, the export of spices reached an all-time high both in terms of value and volume by registering a growth of 17% in US\$ value terms and 30% in volume terms. During 2021-22, the single largest spice exported from India was chili followed by spice oils and oleoresins, mint products, cumin, and turmeric.

India produces about 75 of the 109 varieties listed by the International Organization for Standardization (ISO). The most produced and exported spices are pepper, cardamom, chili, ginger, turmeric, coriander, cumin, celery, fennel, fenugreek, garlic, nutmeg & mace, curry powder, spice oils, and oleoresins. Out of these spices, chili, cumin, turmeric, ginger, and coriander makeup about 76% of the total production.

The largest spices-producing states in India are Madhya Pradesh, Rajasthan, Gujarat, Andhra Pradesh, Telangana, Karnataka, Maharashtra, Assam, Orissa, Uttar Pradesh, West Bengal, Tamil Nadu, and Kerala.

Export Market

India is the largest exporter of spice and spice items. For the year 2021-22, the country exported spices worth US\$4,102.29 million.

India is the largest exporter of spice and spice items. During April-Feb 2023, the country exported spices worth US\$ 3,332.02 million.

In February 2023, the exports of spices from India increased by 44.12% to US\$ 379.51 million. In 2021-22, India exported 1.53 million tonnes of spices. From 2017-18 to 2021-22, the total exported quantity from India grew at a CAGR of 10.47%.

For FY22, total volumes of chilli, cumin, turmeric and ginger exports were 0.55, 0.21, 0.15 and 0.14 million tonnes.

Chilli

Chilli harvesting is complete in almost all chili-producing states of India. The Post-harvest operations at farms continued in major chili-producing states like Andhra Pradesh and Telangana.

Market Trend: Chilli arrivals to markets have decreased considerably and are expected interim gently till the end of April. The farmers and traders are selling their products continuously in the market due to very good prices and are not holding onto their inventory. The cold storage inventory in all the chilly growing regions is only filled up to 50-60 % as the arrivals are very less from both traders and farmers.

Turmeric

The initial forecast of production was high as Turmeric sowing increased by 10-15% across India. However, incessant and widespread rains from September to November led to crop damage almost by 15-20% in Maharashtra and Andhra Pradesh. Turmeric production during the 2022 season is estimated to be around 7 – 7.20 million bags (3,75,000– 4,05,000 MT), almost short by 20% against the 2021 crop. Carryover stock is estimated to be around 2.30 million bags (1,23,000 MT) during February 2022. As per estimates, the total supply for the new season would be around 9 – 9.30 million bags (485,000 – 510,000 MT) including carryover stocks. India consumes more than 80% of the total turmeric production.

Market Trend: Regular finger turmeric prices declined at domestic markets during March 2022 due to good arrivals from new crops and less export demand. Yellow spice lost its color and flavor in domestic markets in terms of price when cumin prices declined in international markets. Currently, finger turmeric is traded at Rs. 75 – 82/kg levels.

Pepper

Pepper harvesting in India is at its last phase and it is estimated to be over by the second half of April. Hence, pepper production in India during 2022 is estimated to be around 55000 – 60000 tons.

Market Trend: Indian pepper prices continued their declining trend during March due to good arrivals and less demand from exporters. Ungarbled pepper was traded at Rs. 490 – 500/kg at domestic markets whereas, garbled pepper was traded at Rs. 530/kg levels.

Potential to grow 2x to INR 50,000 crores by 2025

The Indian blended spices market is growing faster than straight spices. It is expected to reach a 35% share of the total organized spices pie by 2025.

Government Initiatives & Recent Developments in the Spice Industry

Export Development and Promotion of Spices

This initiative by the Spices Board of India aims to support the exporter to adopt high-tech processing technologies and upgrade the existing level of technology for the development of industry and to meet the changing food safety standards of the importing countries. The initiative provides benefits of infrastructure development, promoting Indian spice brands abroad, setting up infrastructure in the major spice growing centers, and promoting organic spices and special programs for north-eastern entrepreneurs.

Setting up and maintenance of infrastructure for common processing (Spices Parks)

Spices Board has launched crop-specific Spices Parks in key production/market centers with an aim to facilitate the farmers to get an improved price realization and wider reach for their produce. The purpose of the park is to have an integrated operation for cultivation, post-harvesting, processing, value-addition, packaging, and storage of spices and spice products. The common processing facilities for cleaning, grading, packing, and steam sterilization will help the farmers to enhance the quality of the produce, resulting in better price realization.

Spice Complex Sikkim

Spices Board submitted a project proposal to the State’s Cell for setting up a Spice Complex in Sikkim seeking financial assistance for facilitating and demonstrating common processing and value addition in spices to help farmers and other stakeholders in the state.

OVERVIEW

Our Company was incorporated on January 29, 2019 as ‘**Srivari Spices and Foods Private Limited**’, a private limited company under the Companies Act, 2013, pursuant to a certificate of incorporation dated January 30, 2019 issued by the Deputy Registrar of Companies, Central Registration Centre. Subsequently, our Company was converted into a public limited company and consequently the name of our Company was changed to ‘**Srivari Spices and Foods Limited**’ and a fresh certificate of incorporation dated December 27, 2022 was issued by the Registrar of Companies, Telangana at Hyderabad. The corporate identification number of our Company is **U15494TG2019PLC130131**.

Our Company is engaged in the business of manufacturing spices and flour (chakki atta) and market & sell it in and around Telangana and Andhra Pradesh. We handpick our raw materials from various parts of the country and process our products with utmost care without the use of artificial preservatives or chemicals, thereby creating a product portfolio of organic spices and flour, which carry the freshness and goodness of each ingredient. Our unique business model has helped us penetrate the niche segment of our market and establish a customer base in and around Telangana and Andhra Pradesh. Our goal since our incorporation was to manufacture quality spices and other food products which are organic and do not contain any artificial preservatives or chemicals, and in order to achieve our goal we have created a unique business model, wherein we manufacture and package our products in quantities which can sustain a customer until the shelf life of our product, in order to avoid wastage and deliver a wide range of products which carry the freshness and goodness of each ingredient. Our business has two model first is direct to customer (“**D2C**”) in nature, wherein we deliver our products directly at the doorstep of our customers using approximately 15,000 retail stores. Secondly we also work in business to business (“**B2B**”), wherein we deliver our products to the suppliers. Our business model has helped us create a strong customer base as the quantity of our products packed and delivered is directly proportional to the shelf life of our products, therefore, once the product is consumed by our customers they place an order for the product and this helps us maintain a cyclic and continuous relationship with our customers. We started our business operations in 2019 by setting up a state of art production facility at Survey number 234/4, and 234/5, Jalpally Village, Balapur Mandal, Jalpally Municipality, Ranga Reddy District, Telangana and manufacturing turmeric powder (haldi), chilli powder (mirchi) and coriander powder (dhaniya). In December 2021, we expanded our business operations by diversifying our product portfolio into madras sambar masala, chicken masala, garam masala and mutton masala in pouches, boxes and bottles. In 2021, our Company was awarded with the title of ‘Best Emerging Spices Brand- 2021’ by Business Mint. Further, in the year 2021, our Company expanded its business operations by setting up a new manufacturing unit at Raikal Village, Farooqnagar Mandal, Ranga Reddy District, Telangana. Lastly, in October 2022 we introduced a new product category by manufacturing whole wheat flour (chakki atta).

Our business model and our products are completely sustainable in nature. We source our raw materials directly from farmers to ensure that we use absolutely natural ingredients in our products. Our business model ensures that the farmers receive complete benefit of their produce without having to share their revenue with market intermediaries. Since, we source our raw materials directly from the farmers, we are able to offer our products at a lower range than our competitors, thereby having a unique pricing model. We source our raw materials from across the country to ensure that the products we manufacture have an authentic taste without artificially disturbing the natural taste of the spices or other food products. For instance, for our chilli powder we source our chillies from the farms of Guntur, Khammam, Warangal, Raichur, Byadgi, Malakpet, Hyderabad and our ‘Srivari Whole Wheat Atta’ and ‘Sharbati Atta’ is made from wheat grains which are sourced from Sehore, Vidisha and Sironj in Madhya Pradesh. Therefore, each of our products is made from the finest natural produce which caters to the genuine taste and an assurance of authenticity.

Sharbati wheat, also known as "Sharbati atta" or "Sharbati gehun" in Hindi, is a distinct variety of wheat primarily cultivated in the central region of India, particularly in Madhya Pradesh. Unlike regular wheat, which encompasses various wheat varieties grown worldwide, Sharbati wheat stands out due to its specific attributes.

Here are the key differences between Sharbati wheat and regular wheat:

Protein content: Sharbati wheat possesses a slightly higher protein content compared to regular wheat, making it an excellent choice for bread-making purposes.

Flavor: Sharbati wheat offers a unique nuttier and sweeter flavor profile, making it a popular preference for creating chapatis or rotis, traditional Indian breads.

Gluten content: Sharbati wheat contains a lower gluten content than regular wheat, which makes it less suitable for producing pastries or cakes that require more gluten for proper texture and structure.

Yield: Sharbati wheat has a lower yield than regular wheat, leading to higher production costs and limited availability in comparison. As a result, it is considered relatively more expensive and less commonly found.

Nutritional value: Sharbati wheat boasts a higher nutritional value, serving as a good source of essential vitamins and minerals like iron, calcium, and potassium. This aspect contributes to its reputation as a healthier alternative to regular wheat.

In summary, Sharbati wheat represents a specific variety of wheat with distinct characteristics. Its higher protein content, sweeter flavor, lower gluten content, and enhanced nutritional value make it an ideal choice for making traditional Indian breads such as chapatis or rotis. However, its lower yield and relatively higher cost limit its widespread availability.

Spices

Particulars	Description
	<p>Indians just love the distinctive flavor and alluring aroma of spices. For all those people who love spicy food, the addition of the extra red chili powder in the food is a treat to eat.</p> <p>Chili peppers are varieties of the berry-fruit of plants from the genus Capsicum, which are members of the nightshade family Solanaceae, cultivated for their pungency. Chili peppers are widely used in many cuisines as a spice to add "heat" to dishes. Capsaicin and related compounds known as capsaicinoids are the substances giving chili peppers their intensity when ingested or applied topically.</p> <p>The hot and fiery flavor isn't the only specialty of it as red chili powder is also a treasure trove of health benefits which include digestive health and reduction in inflammations and pain. It relieves nasal congestion and also helps in improving cognitive functions.</p> <p>This Product available in 50gm, 100gm, 200gm, and 500gm only.</p>
	<p>Coriander (Coriandrum sativum) is an herb in the family Apiaceous. It is also known as dhania or cilantro. All parts of the plant are edible, but the fresh leaves and the dried seeds (which are both an herb and a spice) are the parts most traditionally used in cooking.</p> <p>Coriander powder is used as a common spice in most Indian curries. You will be surprised to know that the seeds, oils, and extracts of this plant promote the secretion of insulin and reduce blood sugar levels.</p> <p>Furthermore, the seeds contain anti-fungal and microbial properties. So, whether used as a seasoning in the lentil curry or vegetables, the goodness stays forever.</p> <p>This Product available in 50gm, 100gm, 200gm, and 500gm only.</p>
	<p>Turmeric is a flowering plant, Curcuma longa (of the ginger family, the rhizomes of which are used in cooking. The plant is native to the Indian subcontinent and Southeast Asia that requires temperatures between 20 and 30 °C (68 and 86 °F) and a considerable amount of annual rainfall to thrive. Plants are gathered each year for their rhizomes, some for propagation in the following season and some for consumption.</p> <p>Turmeric is a must-have in all Indian dishes. One of the most active ingredients of turmeric is curcumin and clinical research proves that consuming it may reduce the possibility of cardiac attacks.</p> <p>Besides, the spice helps in boosting brain functions and reverses the chances of diseases. Small studies also reveal significant benefits of turmeric for fighting depression. Turmeric helps in enhancing brain transmitters, such as serotonin and dopamine, and is also used for treating problems in the gall bladder, skin, and stomach.</p> <p>This Product available in 50gm, 100gm, 200gm, and 500gm only.</p>

Some recipes may also include additional ingredients like bay leaves, fennel seeds, or star anise.</p> <p>Garam masala is often added to dishes near the end of cooking or as a finishing touch to add depth of flavor and aroma. It is commonly used in curries, soups, stews, and other savory dishes in Indian cuisine, and can also be used to flavor rice, vegetables, and meat dishes.</p> <p>This Product available in 50gm, 100gm, 200gm, and 500gm only.</p>

The Prevention of Sexual Harassment at Workplace Act, 2013

Definition of Sexual Harassment: The Act defines sexual harassment broadly, including any unwelcome physical, verbal, or non-verbal conduct of a sexual nature that interferes with an individual's work or creates an intimidating, hostile, or offensive environment.

Employer's Responsibility: The Act places the responsibility on employers to prevent sexual harassment in the workplace. Employers are required to establish an Internal Complaints Committee (ICC) at each workplace with 10 or more employees, or a Local Complaints Committee (LCC) at workplaces with fewer than 10 employees.

Internal Complaints Committee (ICC): The ICC is responsible for receiving and addressing complaints of sexual harassment. The ICC conducts inquiries and recommends action against the accused.

Complaints Procedure: The Act provides a mechanism for filing complaints of sexual harassment. It mandates that complaints be in writing, addressed to the ICC/LCC, and submitted within a specific timeframe. The Act ensures the confidentiality of the complainant and prohibits victimization or retaliation.

Penalties: The Act stipulates penalties for non-compliance with its provisions. Failure to constitute an ICC or LCC, non-compliance with the inquiry process, or non-implementation of the ICC's recommendations may result in fines.

Awareness and Training: Employers are required to organize awareness programs and provide regular training on the prevention of sexual harassment to employees. This helps create awareness, sensitizes individuals about the issue, and promotes a culture of respect and dignity in the workplace.

All assets and liabilities have been classified as current or non-current as per the Company's normal operating cycle and other criteria set out in Schedule III to the Companies Act, 2013.

b. Use of Estimates

The preparation of the financial statements in conformity with GAAP requires Management to make estimates and judgments that affect the reported balances of assets and liabilities and disclosure relating to contingent liabilities as at the date of the financial statements and reported amounts of income and expenses during the period for the periods presented. Management believes that the estimates used like Net realizable value of Inventories etc. in the preparation of financial statements are prudent and reasonable. Future results could differ from these estimates.

The following significant accounting policies are adopted in the preparation and presentation of these financial statements:

1. Revenue recognition

Sale of Goods:-

Revenue is recognised to the extent that it is probable that the economic benefits will flow to the company and the revenue can be reliably measured.

Revenue is recognised when the significant risks and rewards of ownership of the goods have passed to the buyer which generally coincides with the dispatch/delivery of goods to customers and where there is a reasonable certainty of acceptance of goods by the customer.

Goods & Service Tax are not received by the company on its own account. Rather, it is tax collected on value added to the commodity by the seller on behalf of the government. Accordingly, it is excluded from revenue.

Interest Income:

Interest income is recognised on a time proportion basis taking into account the amount outstanding and the rate applicable.

2. Property, plant and equipment

Property, plant and equipment have been stated at cost of acquisition inclusive of expenses directly attributable / related to the acquisition/ construction/erection of such assets. GST and other applicable taxes paid on acquisition of property, plant and equipment are capitalized to the extent not available/ utilizable as input tax credit under GST or other relevant law in force.

Expenditure incurred on renovation and modernization of PPE on completion of the originally estimated useful life resulting in increased life and/or efficiency of an existing asset, is added to the cost of the related asset. In the carrying amount of an item of PPE, the cost of replacing the part of such an item is recognized when that cost is incurred if the recognition criteria are met. The carrying amount of those parts that are replaced is derecognized in accordance with the derecognition principles.

After initial recognition, PPE is carried at cost less accumulated depreciation/amortization and accumulated impairment losses, if any.

An item of property, plant and equipment is derecognized upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the Statement of Profit and Loss when the asset is derecognized.

Depreciation and Amortization

a. Property Plant and Equipment

Depreciation on Plant, Property and Equipment is calculated on a Written down value method as per useful life of asset prescribed under Schedule II of the Companies Act, 2013.

b. Intangible Assets

In respect of Intangible asset, the company has estimated the useful life of the asset assumed to be 4 years

3. Impairments

The Company assesses at each reporting date as to whether there is any indication that any property, plant and equipment and intangible assets or group of assets, called cash generating units (CGU) may be impaired. If any such indication exists the recoverable amount of an asset or CGU is estimated to determine the extent of impairment, if any. When it is not possible to estimate the recoverable amount of an individual asset, the Company estimates the recoverable amount of the CGU to which the asset belongs.

An impairment loss is recognised in the Statement of Profit and Loss to the extent, asset's carrying amount exceeds its recoverable amount. The recoverable amount is higher of an asset's fair value less cost of disposal and value in use. Value in use is based on the estimated future cash flows, discounted to their present value using pre-tax discount rate that reflects current market assessments of the time value of money and risk specific to the assets.

The impairment loss recognised in prior accounting period is reversed if there has been a change in the estimate of recoverable amount.

Defined Benefits Plans

The cost of the defined benefit plan and other post-employment benefits and the present value of such obligation are determined using actuarial valuations. An actuarial valuation involves making various assumptions that may differ from actual developments in the future. These include the determination of the discount rate, future salary increases, mortality rates and future pension increases. Due to the complexities involved in the valuation and its long-term nature, a defined benefit obligation is highly sensitive to changes in these assumptions. All assumptions are reviewed at each reporting date.

The company has recognized the gratuity payable to the employees as defined benefit plans. The liability in respect of these benefits is calculated using the Projected Unit Credit Method and spread over the period during which the benefit is expected to be derived from employees' services.

Our total revenue from FY21 to FY23 grew by 77.27% CAGR.

FACTORS AFFECTING OUR RESULT OF OPERATIONS

Except as otherwise stated in this Prospectus and the Risk Factors given in the Prospectus, the following important factors could cause actual results to differ materially from the expectations include, among others:

Regulatory Framework

We have obtained all regulatory permissions which are necessary to run our business, Further, some of the approvals are granted for fixed periods of time and need renewals, which are obtained in the course of business, however, there may be change in statutory regulations at any time which cannot be predicted by us. There can be no assurance that the change in regulations will not impact our operations in the future.

Ability of Management

Our success depends on the continued services and performance of the members of our management team and other key employees. Competition for senior management in the industry is intense, and we may not be able to retain our existing senior management or attract and retain new senior management in the future. The loss of the services of our Promoters

could seriously impair our ability to continue to manage and expand our business. Further, the loss of any other member of our senior management or other key personnel may adversely affect our business, results of operations and financial condition.

Ability to manage logistics and transportation needs

Apart from in-house transportation facility we rely on third party transportation and other logistic facilities at every stage of our business activity including for procurement of products from our suppliers and for transportation from our factory to our customers and other markets. Since the cost of our goods also carried by third party transporters is typically much higher than the consideration paid for transportation, it may be difficult for us to recover damages for damaged, delayed or lost goods. Our operations and profitability are dependent upon the availability of transportation and other logistic facilities in a time and cost-efficient manner. Accordingly, our business is vulnerable to increased transportation costs, transportation strikes and lock-outs, shortage of labour, delays and disruption of transportation services for events such as weather-related problems and accidents. Further, global supply chains can be impacted with the increase in the fees of shipping routes putting cost pressures. Further, movement of goods encounters additional risks such as accidents, pilferage, spoilage or shrinkage may adversely affect our operations, results of operations and financial condition. Although we have not experienced any material logistics and transport related disruptions in the past, any prolonged disruption or unavailability of such facilities in a timely manner could result in delays or non-supply or may require us to look for alternative sources which may not be cost-effective, thereby adversely affecting our operations, results of operations, cash flows and financial condition.

Market & Economic conditions

India is one of the largest economies and is growing at a rapid pace. But in this globalised economy, all the businesses face an uncertain level of volatility from unexpected global events which ranges from global pandemics to wars, to weather changes to supply chain disruption, which may change the economic dynamics and the purchasing capability of the end customers. At the time of market slowdown the demand falls which has adverse impact on our business. ***Competition***

We operate in a competitive atmosphere. Our competition varies by market, geographic areas and type of products. Our Company may face stiff competition from domestic as well as global market as the dynamic changes. Some of our competitors may have greater resources than those available to us. While service quality, technical ability, performance records, etc are key factors in client decisions among competitors, however, price & quality are the deciding factor in most cases. Further, this industry is fragmented with many small and medium sized companies and entities, which manufactures some of these products at various levels, which may adversely affect our business operation and financial condition. Further, there are no entry barriers in this industry and any expansion in capacity of existing manufacturers would further intensify competition. Moreover, as we seek to diversify into new geographical areas, new territories, new emerging markets, we face competition from competitors that have a pan-India presence and also from competitors that have a strong presence in regional markets. The markets in which we compete and intend to compete are undergoing, and are expected to continue to undergo, rapid and significant change. We expect competition to intensify as technological advances and consolidations continue. These competitive factors may force us to reduce rates, and to pursue new market opportunities. Increased competition could result in reduced demand for our products, increased expenses, reduced margins and loss of market share. Failure to compete successfully against current or future competitors could harm our business, operating cash flows and financial condition.

COVID-19 Pandemic

Since the onset of the COVID-19 pandemic in March 2020, our Company's operations have been affected as our employees faced the threat of getting infected. In 2020, cases of the novel corona virus started rapidly increasing in India, which led the government of India to impose a nationwide lockdown. The spread of Covid-19 and its recent developments have had and might continue to have repercussions across local, national and global economies. To prevent the spread of Covid-19 and to comply with the restrictions, we had to temporarily suspend our operations in order to follow the Government's norms. We continuously monitored the economic conditions and have outlined sufficient measures to combat the pandemic situation at our business premises. Once the lockdown was lifted, our operations restarted in full swing. Initially we did find a little hiccup in finding workers but because of our enterprising organization, we were able to source quality workforce and we were able to train them and we restarted our operations. After lifting the lockdown and resuming our operations the demand in our industry abruptly increased from the different sectors and we attained the highest production during the partial year 2020-21 and FY 2021-22. The demand after pandemic ultimately nullified the impact of shutdown during COVID 19 pandemic. The future impact of COVID-19 or any other severe communicable disease on our business and results of operations depends on several factors including those discussed in the chapter "***Risk Factors***" beginning on Page No. 25. We are continue to closely monitor the economic conditions and the effect of COVID-19 and have outlined certain measures to combat the pandemic situation and to minimize the impact on our business.

Significant Developments after March 31st, 2023 that may affect our Future Results of Operations

The Directors confirm that there have been no other events or circumstances since the date of the last financial statements as disclosed in the Red Herring Prospectus which materially or adversely affect or is likely to affect the business or profitability of our Company or the value of our assets, or our ability to pay liabilities within next twelve months.

Phased implementation of Unified Payments Interface

SEBI has issued UPI Circulars in relation to streamlining the process of public issue of equity shares and convertibles. Pursuant to the UPI Circulars, UPI has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under ASBA) for applications by RIIs through intermediaries with the objective to reduce the time duration from public issue closure to listing from six Working Days to upto three Working Days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI Mechanism, the UPI Circulars proposes to introduce and implement the UPI Mechanism in three phases in the following manner:

- a) Phase I: This phase was applicable from January 01, 2019 and lasted till June 30, 2019. Under this phase, a Retail Individual Bidder, besides the modes of Bidding available prior to the UPI Circulars, also had the option to submit the Bid cum Application Form with any of the intermediary and use his / her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing continued to be six Working Days.
- b) Phase II: This phase has commenced with effect from July 01, 2019 and will continue for a period of three months or floating of five main board public issues, whichever is later. Under this phase, submission of the Bid cum Application Form by a Retail Individual Investor through intermediaries to SCSBs for blocking of funds has been discontinued and has been replaced by the UPI Mechanism. However, the time duration from public issue closure to listing continues to be six Working Days during this phase. SEBI vide its circular no.

SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020 extended the timeline for implementation of UPI Phase II till further notice.

- c) Phase III: Subsequently, the time duration from public issue closure to listing would be reduced to be three Working Days.

Pursuant to the UPI Circular, SEBI has set out specific requirements for redressal of investor grievances for applications that have been made through the UPI Mechanism. The requirements of the UPI Circular include, appointment of a nodal officer by the SCSB and submission of their details to SEBI, the requirement for SCSBs to send SMS alerts for the blocking and unblocking of UPI mandates, the requirement for the Registrar to submit details of cancelled, withdrawn or deleted applications, and the requirement for the bank accounts of unsuccessful Bidders to be unblocked not later than one day from the date on which the Basis of Allotment is finalized. Failure to unblock the accounts within the timeline would result in the SCSBs being penalised under the relevant securities law. Additionally, if there is any delay in the redressal of investors complaints in this regard, the relevant SCSB as well as the post – Issue BRLM will be required to compensate the concerned investor.

All SCSBs offering the facility of making applications in public issues shall also provide the facility to make application using UPI. The Company was required to appoint one of the SCSBs as a Sponsor Bank to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and/ or payment instructions of the Retail Individual Bidders using the UPI.

The processing fees for applications made by Retail Individual Bidders using the UPI Mechanism may be released to the remitter banks (SCSBs) only after such banks provide a written confirmation on compliance with SEBI Circular No: SEBI/HO/CFD/DIL2/P/CIR/2021/570 dated June 2, 2021 read with SEBI Circular No: SEBI/HO/CFD/DIL2/CIR/P/2021/2480/1/M dated March 16, 2021.

Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹20 to ₹ 24 per share, Issue size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Issue the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹ 22.00 in the above example. The Issuer, in consultation with the BRLM, may finalise the Issue Price at or below such Cut-Off Price, i.e., at or below ₹ 22.00. RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and FEMA. While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. Foreign investment is allowed up to 100% under automatic route in our Company.

The RBI and the concerned ministries/departments are responsible for granting approval for foreign investment. The Government has from time to time made policy pronouncements on foreign direct investment (“FDI”) through press notes and press releases. The Department for Promotion of Industry and Internal Trade, Ministry of Commerce and Industry, Government of India (earlier known as the Department of Industrial Policy and Promotion) (“DPIIT”), issued the FDI Policy, which, with effect from October 15, 2020 consolidated, subsumed and superseded all previous press notes, press releases and clarifications on FDI issued by the DPIIT that were in force and effect prior to October 15, 2020. In terms of FDI Policy, FDI to an extent of 51% is allowed in multi brand retail trading with government approval. The FDI Policy will be valid until the DPIIT issues an updated circular. FDI in companies engaged in sectors/ activities which are not listed in the FDI Policy is permitted up to 100% of the paid-up share capital of such company under the automatic route, subject to compliance with certain prescribed conditions.

The Government has from time to time made policy pronouncements on FDI through press notes and press releases. The Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India (DIPP), issued consolidated FDI Policy, which with effect from August 28, 2017 consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by the DIPP that were in force and effect as on August 27, 2017. The Government proposes to update the consolidated circular on FDI Policy once every year and therefore, the Consolidation FDI Policy will be valid until the DIPP issues an updated circular.

The transfer of shares by an Indian resident to a Non-Resident does not require the prior approval of the FIPB or the RBI, provided that (i) the activities of the investee company are under the automatic route under the Consolidated FDI Policy and transfer does not attract the provisions of the SEBI (Substantial Acquisition of Shares and Takeovers) Regulations, 2011; (ii) the non-resident shareholding is within the sectoral limits under the Consolidated FDI Policy; and (iii) the pricing is in accordance with the guidelines prescribed by SEBI/RBI.

Further, in terms of the FEMA Non-debt Rules, the aggregate FPI investment limit is the sectoral cap applicable to Indian company as prescribed in the FEMA Non-Debt Instruments Rules with respect to its paid-up equity capital on a fully diluted basis. See “*Issue Procedure*” beginning on page 181.

Further, in accordance with the FDI Policy, the Press Note No. 3 (2020 Series), dated April 17, 2020 issued by the DPIIT and the FEMA Non-debt Rules, any investment, subscription, purchase or sale of equity instruments by entities of a country which shares land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country (“Restricted Investors”), will require prior approval of the Government, as prescribed in the FDI Policy and the FEMA Non-debt Rules. Further, in the event of transfer of ownership of any existing or future foreign direct investment in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction/ purview, such subsequent change in the beneficial ownership will also require approval of the Government. Furthermore, on April 22, 2020, the Ministry of Finance, Government of India has also made a similar amendment to the FEMA Non-Debt Rules. Each Bidder should seek independent legal advice about its ability to participate in the Issue. In the event such prior approval of the Government of India is required, and such approval has been obtained, the Bidder shall intimate our Company and the Registrar in writing about such approval along with a copy thereof within the Bid/Issue Period.
